On-site workshop

# eInvoicing Implementation Workshop

---

12 November 2018, Prague, Czech Republic

🐦 #ConnectingEurope

## Today's speakers

### **Christian Rasmussen**

Christian is an experienced eProcurement Expert specialized in the execution of large scale ICT projects with past experience from the Nordic region including Denmark, Norway and Sweden. Christian has also been involved in the past EU-funded large scale pilots PEPPOL.eu and eSENS.eu as Work packager leader including focus on new eProcurement and eDelivery development.

### **Martin Forsberg**

Martin Forsberg works as an expert in the area of electronic business, customs and financial processes. Martin was involved in the PEPPOL and eSENS Large Scale Pilots. He is active in standardization committees such as CEN TC434 and OASIS UBL.

 **#ConnectingEurope**

at CEF Digital

### AFTER

Download our other  
webinar recordings

Interact with our  
online community

---

## Objectives of this workshop

Participants will learn about:

- CEF eInvoicing and our services
- The **European norm** and the **Directive 2014/55/EU** on electronic invoicing in public procurement
- Presentation of the European norm and related **specifications**
- **Ways to implement eInvoicing**

## Audience for this workshop

- Public authorities
- Private entities
- Policy makers
- Members of standardisation bodies
- eInvoicing implementers for:
  - Software services
  - Solution providers

---

# **CEF eInvoicing – Our services and how to get started**

## **What is CEF eInvoicing**

## What is CEF?

## HOW IS IT REGULATED?

### CEF Regulation

The Connecting Europe Facility (CEF) is a regulation that defines how the Commission can finance support for the establishment of trans-European networks to reinforce an interconnected Europe.

### CEF Telecom Guidelines

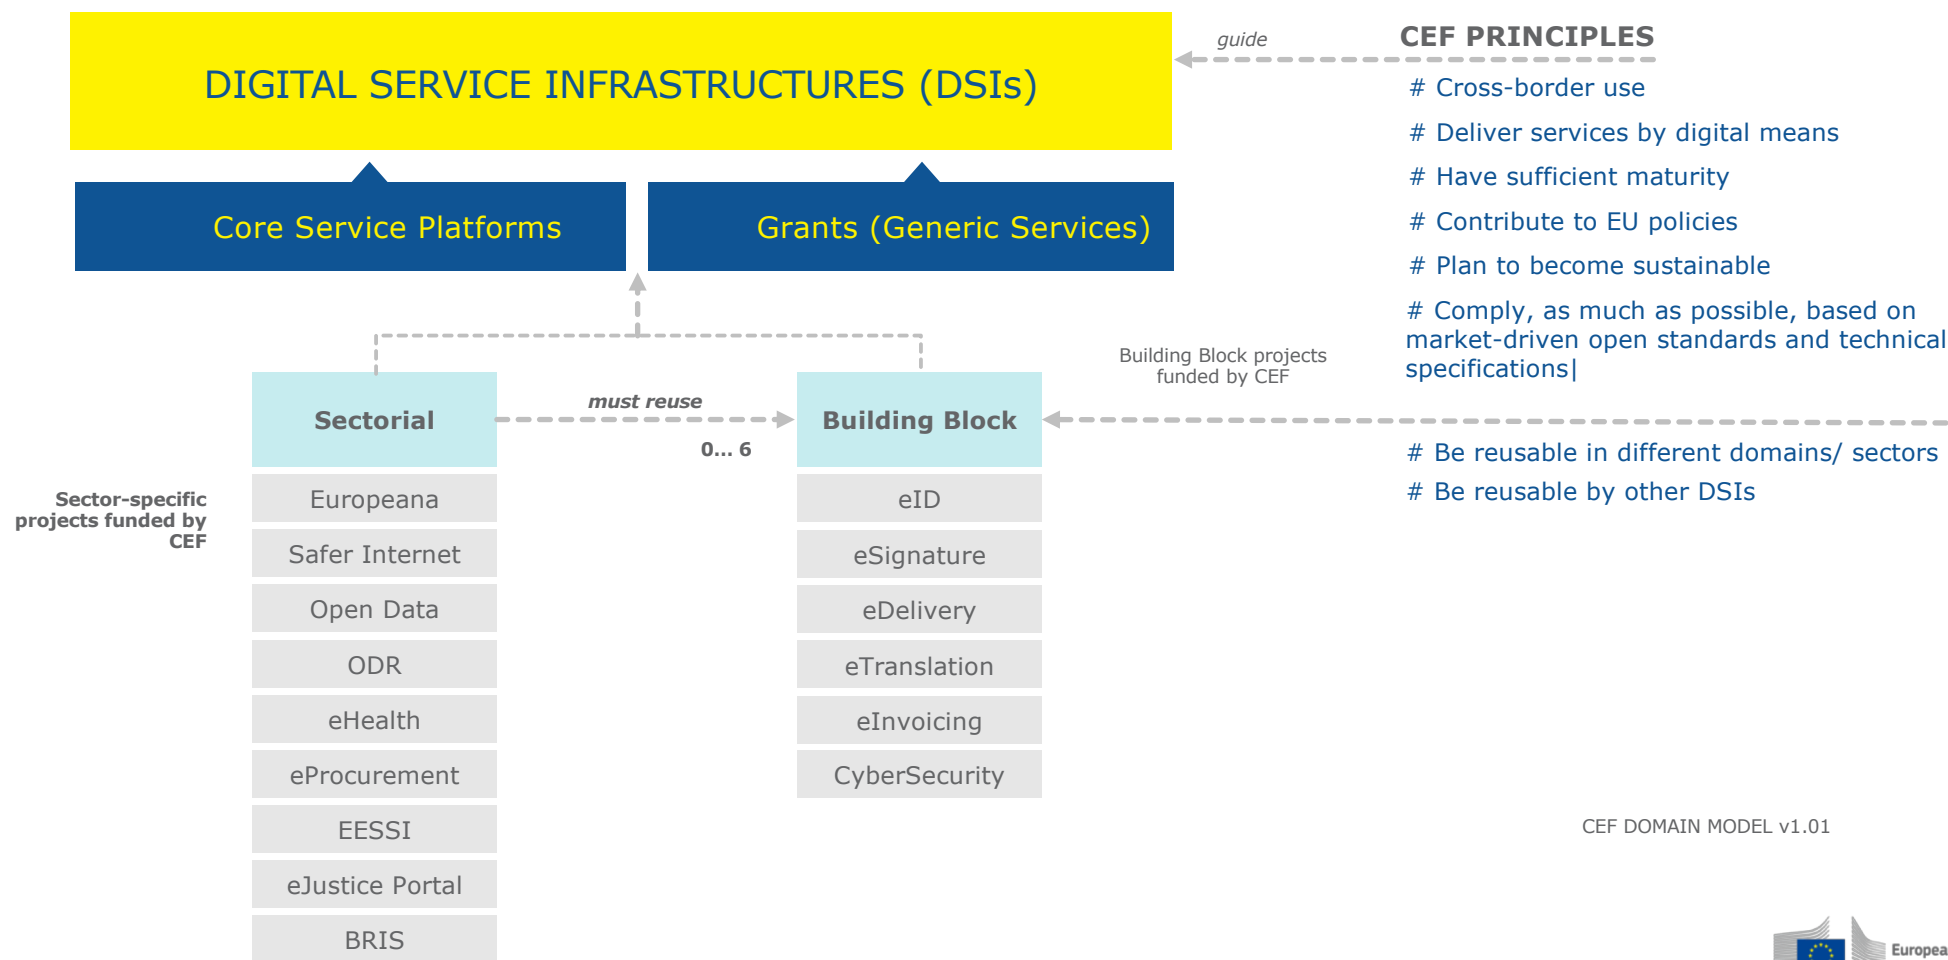

The CEF Telecom guidelines cover the specific objectives and priorities as well as eligibility criteria for funding of broadband networks and Digital Service Infrastructures (DSIs).

### CEF Work Programmes

Translates the CEF Telecom Guidelines in general objectives and actions planned on a yearly basis.

\* - 100 M Juncker Package

# What are Digital Service Infrastructures?

CEF DOMAIN MODEL v1.01

(\*) A Building Block is a package of technical specifications, services and sample software that can be reused in different policy domains:

# The 'Big Picture'

## GRANTS

Projects in the Member  
States

Typically 'deployment' projects at national level (up to  
75% of eligible cost)

## New DSI's!!!

- **In 2019, 3 new DSIs will be launched and new funding will be made available through CEF.**
- **Big Data Testing Facilities**
- **eArchiving**
- **Context Broker (FIWARE)**

The screenshot shows the CEF Digital website with the header 'CEF Digital Connecting Europe'. The navigation menu includes 'CEF', 'Building Blocks', 'Digital Infrastructures', 'News', and 'Contact us'. The main content area is titled 'Meet the new CEF Building Blocks' and features a large graphic of the European map with yellow dots. Text on the graphic includes 'A Connecting Europe Event', 'Meet the new CEF Building Blocks', '7 December 2018', and 'Breydel Auditorium, Brussels'. On the right side, there is a 'Latest' section with links to 'Event calendar', 'Digital Infrastructures', 'Media library', and 'Success stories'. Below that is a 'Follow us' section with Twitter and LinkedIn icons. At the bottom right, there is a 'Subscribe to our newsletter' section with an email address input field and a 'Subscribe' button.

# CEF eInvoicing Trainings

---

## OBJECTIVE OF THE SERVICE

The CEF eInvoicing training service provides policy makers, public entities, suppliers to public entities, solution & service providers with information on the eInvoicing Directive and the European standard on eInvoicing. The following type of sessions are available:

Implementation workshops – one full or one half-day on-site workshop provided to public entities and policy makers So far workshops in **Cyprus, Finland, Estonia, Poland, Greece, Croatia, Ireland, Sweden and Malta**; Apply via [CEF-BUILDING-BLOCKS@ec.europa.eu](mailto:CEF-BUILDING-BLOCKS@ec.europa.eu)

Remote trainings – live open online sessions focused on eInvoicing topics for specialised target audiences

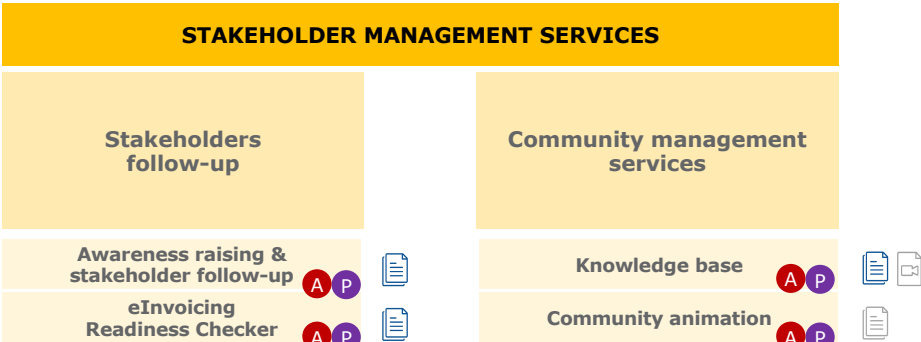

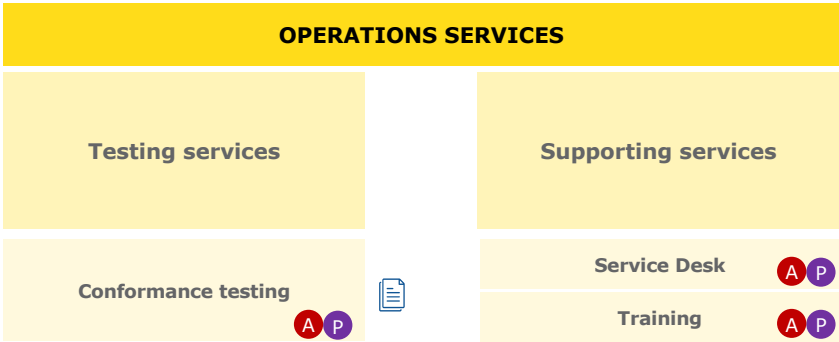

Webinars – series of 9 one-hour long webinars on eInvoicing topics open to all audiences (all materials & recordings available on CEF Digital)

## BENEFITS

- Free of charge information sessions that aim to support public entities and software & service providers to comply with the eInvoicing Directive and the European standard on eInvoicing

# CEF eInvoicing Service offering

AUDIENCE

-  Public Administrations
-  Solution Providers

-  Available
-  Coming soon

### Service offering Description (SoD)

All services are described in an SoD describing its purpose, the users for which it is for, its benefits and the process to use it

### Service Level Arrangements (SLA)

Documents that describe Service Level Targets to be reached when delivering Building Block Services.

### eLearning, videos, success stories

Some services feature multimedia such as eLearnings, instructional videos or success stories to help grasp what the service is about

### CEF Digital platform

CEF eInvoicing service offering, and more about the building block, can be found online

[CEF Digital >](#)

# **Achievements**

## Past eInvoicing workshops

Scope changed during the first year from **capacity building** to **actual hands-on** implementation workshops.

Different maturity levels in the EU:

- Only few high maturity Member States
- Large group of Member States getting started
- 8 less maturity Member States

- **11 on-site workshops** held from **Sep. 2017 to Oct. 2018**

	2017	2018	2019	Request
September	Finland Cyprus			
October		Sweden Lithuania		
November	Poland Estonia	Czech Rep. Germany		
December	Greece	Austria Spain		
January			Ireland (2) Portugal	
February		Croatia		Denmark Norway Belgium Italy Latvia France Greece (2) Estonia (2) Cyprus (2) Finland (2)
March		EESPA	EESPA	
April		Ireland Malta		
May				
June				
				EESPA? EBA?

**Green** =  
Done or planned

**Red** =  
Agreed but  
details missing

**Blue** =  
Request for  
workshop but  
not planned

**New focus**

---

## Current landscape

First set of workshops was intended to:

- Setting the scene
- Getting Member States up to speed with eInvoicing
- Focus on Public authorities

The Member States are going from **gaining knowledge and capacity building** to **actual implementations** of the eInvoicing Directive

- Only few Member States are implementation "ready"
- Large group of countries is now moving faster
- Some Member States still have no active role in the community or is currently planning for implementation

---

## New focus = new material and workshops

With the **increase in demand** and **change of scope**, CEF will focus on:

- Getting the last Member States onboard
- Onboarding service providers
- New material on implementation roadmaps
- New Webinars

**Focus has changed** in **75%** of the Member States to **actual implementation** of the building blocks, CIUS creation, governance model.

We will **continue to offer the first workshop** to those countries who did not yet benefit from it.

On request, we will offer **follow-up workshops on onboarding service providers** and only if demand permits.

***New content available for workshops and webinars oriented towards private sector including best practice, roadmaps and implementation guides, hands-on support with CIUS and eDelivery.***

**What you can get from us**

---

## Free Workshops – Free Material – provided by CEF

**The workshop modules which have taken place so far assessed the needs for implementation of the European standard on eInvoicing in national contexts and focused on the information below:**

- **Lessons learned** and **success stories** from early adopters of eInvoicing solutions, presenting the benefits of eInvoicing from a user's perspective;
- The **European standard**, its compliant syntaxes and their conversion and validation mechanisms;
- **Grant funding** for eInvoicing projects;
- **Other resources and tools** from the CEF eInvoicing Building Block (such as the eInvoicing Readiness Checker).

## Highlights covered in Implementation workshops to date include:

- Infrastructure based on the [CEF eDelivery](#) architecture
- Basic XML using examples from the EN-syntaxes + mapping/conversion considerations
- Understanding OASIS UBL 2.1 and Understanding UN/CEFACT CII D16B
- Examples of early adopters of large scale eInvoicing – lessons learned
- eInvoicing from a user perspective (including ordering and payments)
- Funding and grants
- CEF tools and community
- History of CEF

---

## Free Workshops – Free Material – provided by CEF

**The workshop modules which have taken place so far assessed the needs for implementation of the European standard on eInvoicing in national contexts and focused on the information below:**

- **Lessons learned** and **success stories** from early adopters of eInvoicing solutions, presenting the benefits of eInvoicing from a user's perspective;
- The **European standard**, its compliant syntaxes and their conversion and validation mechanisms;
- **Grant funding** for eInvoicing projects;
- **Other resources and tools** from the CEF eInvoicing Building Block (such as the eInvoicing Readiness Checker).

## The new material includes:

- **Hands-on support** and examples of CIUS creation
- **Roadmaps** and **guidelines** towards implementation of the Directive - public and private sector
- **Governance models** and steps towards public policy creation around the Directive
- **Security aspects** of eInvoicing and eDelivery - eIDAS compliance
- **Status updates** on implementations in the Member States with examples from the implementers

---

# eInvoicing from a user's perspective

---

**Martin Forsberg**

DIGIT

---

## Background

- Problems with **many standards**
- **Lack of normative contextualised standards** (only workshop agreements)
- **Different approaches and ambitions** in Member States to implementing eInvoicing and eProcurement
- The Directive on electronic invoicing in public procurement ([Directive 2014/55/EU](#)) was developed, setting a **minimum requirement** for the public sector

### From the Directive

*The benefits of electronic invoicing are maximised when the generation, sending, transmission, reception and processing of an invoice can be fully automated.*

...

*A mere image file should not be considered to be an electronic invoice for the purpose of this Directive.*

---

## Requirements for the contracting authorities/entities

### From article 7

#### ***Receipt and processing of electronic invoices***

*Member States shall ensure that contracting authorities and contracting entities **receive and process electronic invoices** which comply with the **European standard on electronic invoicing** whose reference has been published pursuant to Article 3(2) and with **any of the syntaxes on the list** published pursuant to Article 3(2).*

a list with a limited number of syntaxes which comply with the European standard on electronic invoicing

Semantic data model of the core elements of an electronic invoice

# Definitions

(1) '**electronic invoice**' means an invoice that has been issued, transmitted and received in a structured electronic format which allows for its automatic and electronic processing;

(2) '**core elements of an electronic invoice**' means a set of essential information components which an electronic invoice must contain in order to enable cross-border interoperability, including the necessary information to ensure legal compliance;

(3) '**semantic data model**' means a structured and logically interrelated set of terms and their meanings that specify the core elements of an electronic invoice;

(4) '**syntax**' means the machine readable language or dialect used to represent the data elements contained in an electronic invoice;

(5) '**syntax bindings**' means guidelines on how a semantic data model for an electronic invoice could be represented in the various syntaxes;

---

So eInvoicing, in the context of the Directive, is

- Formatted in a structured way so that it can be processed efficiently
- Issued, transmitted and received electronically

This rules out:

- Paper invoices which are scanned by the receiver but managed in an electronic workflow system
- PDF-invoices created by the issuer and sent to the receiver

## **eInvoicing from a user perspective**

---

## Why eInvoice?

Quicker payments

Better quality

Good for environment

Saves time

Better security

Required by the customer

Cost saving

Required by law?

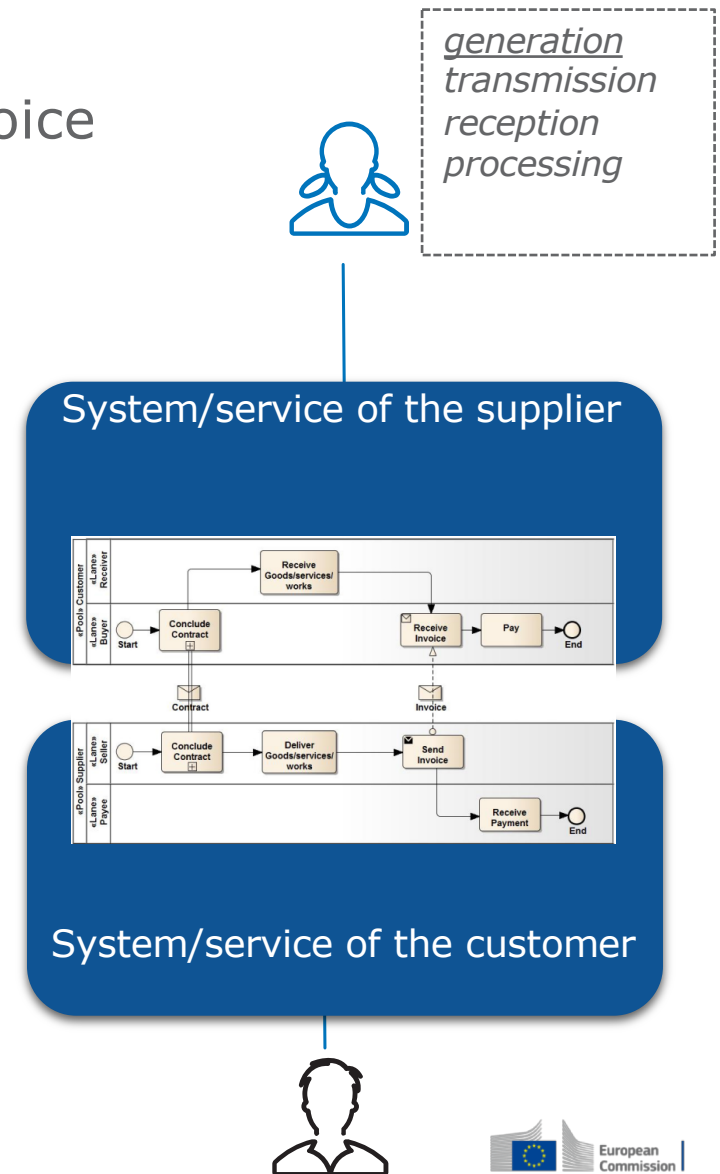

## Many different options – Generation of the eInvoice

### Generation of the eInvoice, examples

- Directly from the ERP/Accounting system
  - Often internal format which is transformed into exchange format
- Through a web-portal
  - Provided by the customer
  - By supplier's own choice
- Printer capture/Virtual printer
  - Software installed as printer
  - When printing, the data is captured and transformed to an eInvoice

*Preferred option may depend on*

- Volume of invoices
- Size of supplier
- Requirement from customer

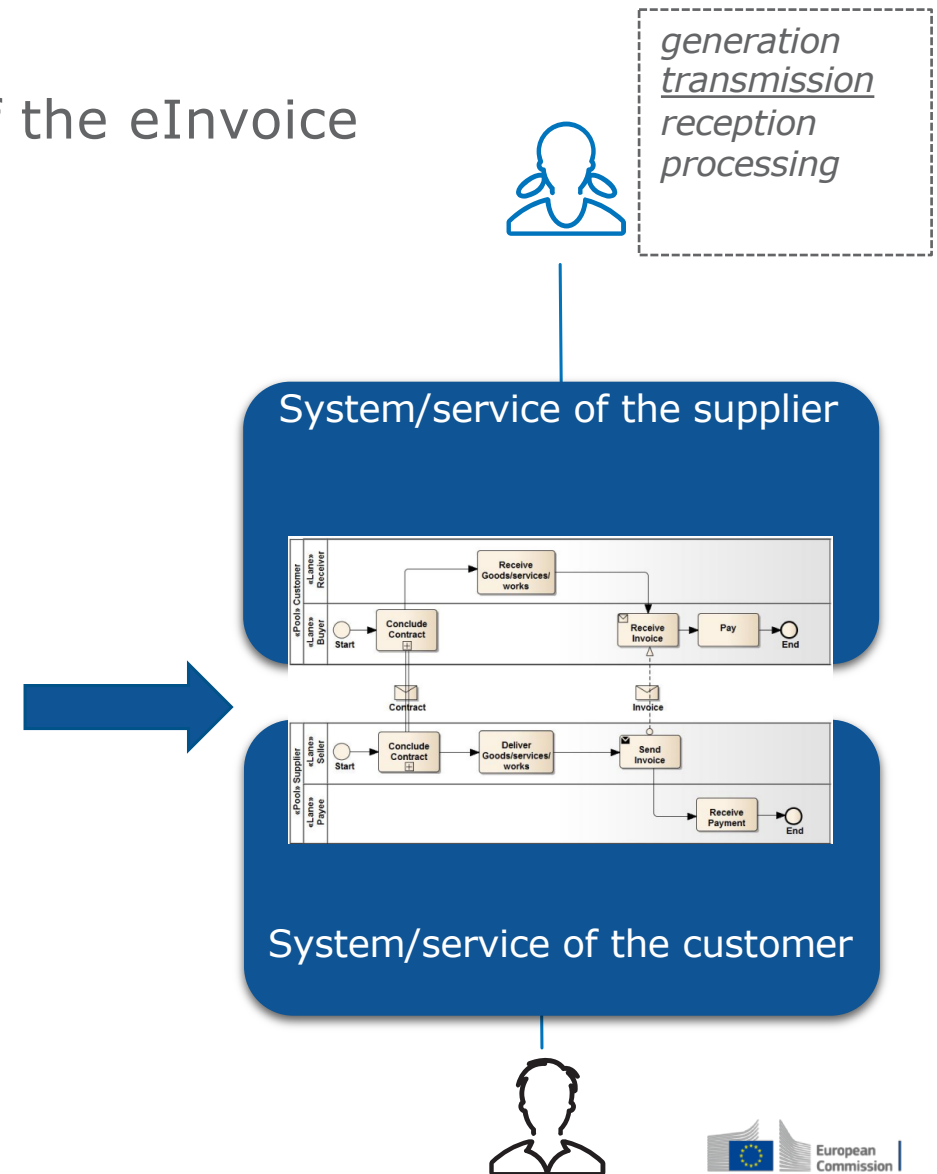

## Many different options – transmission of the eInvoice

### Transmission of the eInvoice

- 4-corner model – often with help from a service provider
  - Connected to network of other service providers
  - Connected to an eDelivery network (PEPPOL)
- 3-corner model – both trading partners are using the same platform
- 2-corner - Peer-to-peer, direct connection
  - FTP, web service/API, e-mail

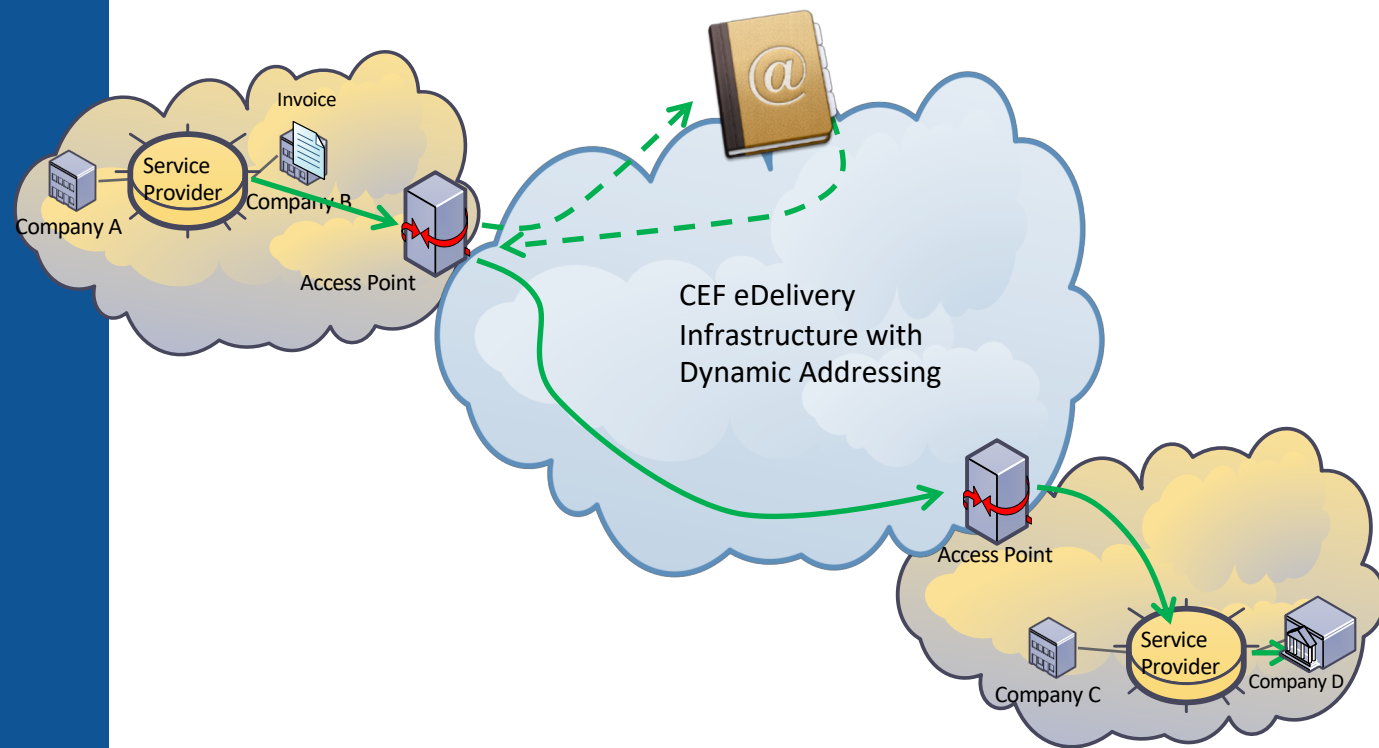

## Challenges with most models

- Onboarding of trading partners often requires testing/configuration
- Service providers often charge per trading partner's connection
- Addressing configuration often managed "statically"
- Changing service provider (and migrating all trading partners) can be costly

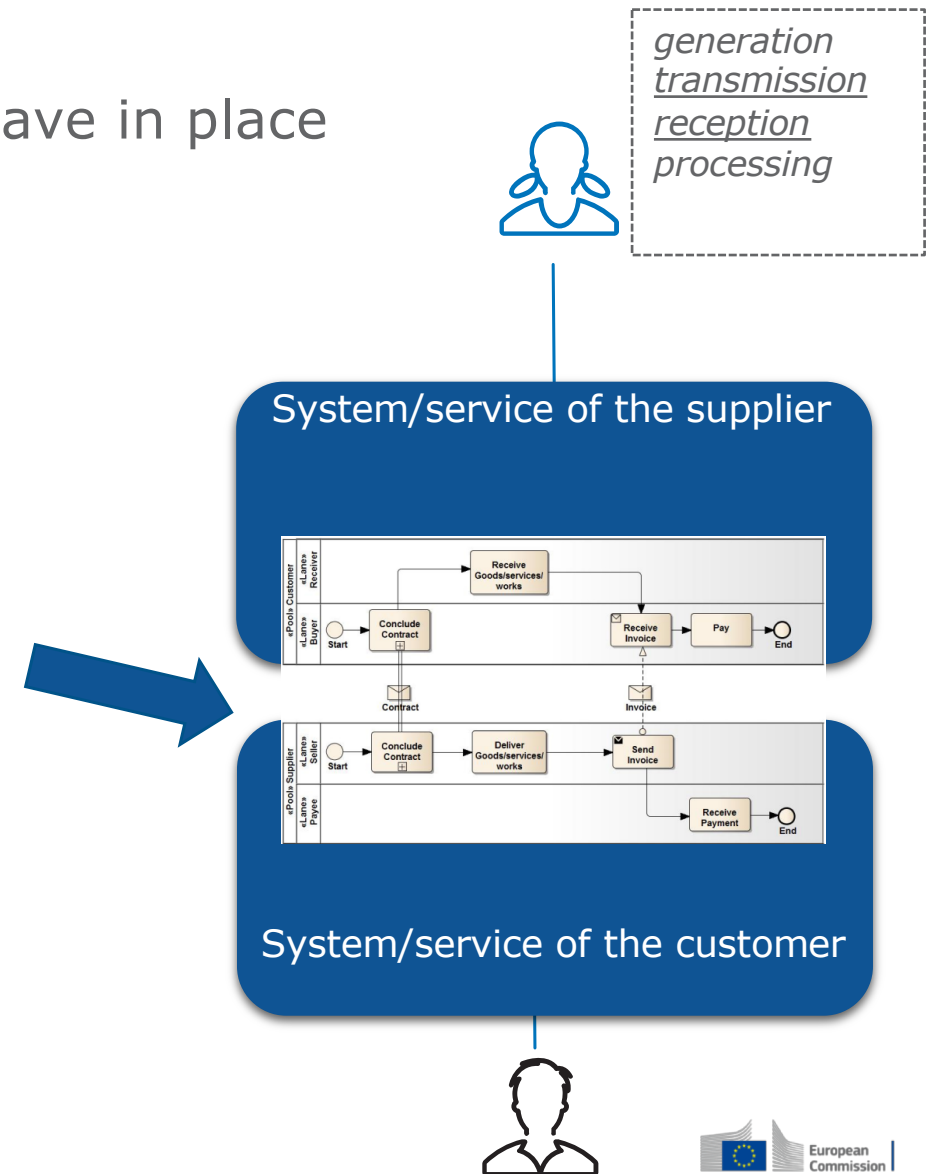

## CEF eDelivery (PEPPOL) offers dynamic addressing

- The receiving address is stored in a registry in the network
- No need for pre-configuration of each trading partner
- Dynamic addressing enables mass adoption
- Makes migration between service providers easier

## Reception of eInvoice - components to have in place

- Service for receiving eInvoices
  - The "inbox"/ or technical entry point (access point)
  - May support several formats
  - Important aspects: connectivity with other service providers, logging, validation and archiving
- Workflow for eInvoice/eProcurement solution
  - For handling the eInvoices in an efficient manner
  - Visualization, assessment/approval
  - Sometimes integrated in the ERP but often a separate service
- ERP/Accounting solution
  - For accounting and payment initiation

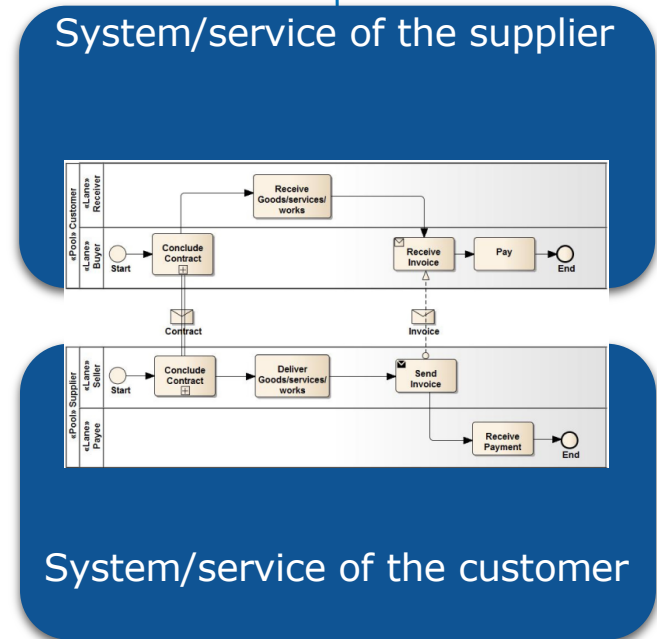

# Centralized or decentralized handling of invoice assessment

- For invoices which are not automatically matched, a manual assessment is necessary
- By using references, the invoice can be forwarded directly to the person/role responsible for assessing the invoice
  - Requires a workflow system
  - Important with data quality of the reference value
  - Sometimes hard to make the supplier to provide/enter the reference
- Without available references, all invoices are received by a single entry point
  - Person/function assessing or forwards the invoice to the relevant person

*generation*  
*transmission*  
*reception*  
*processing*

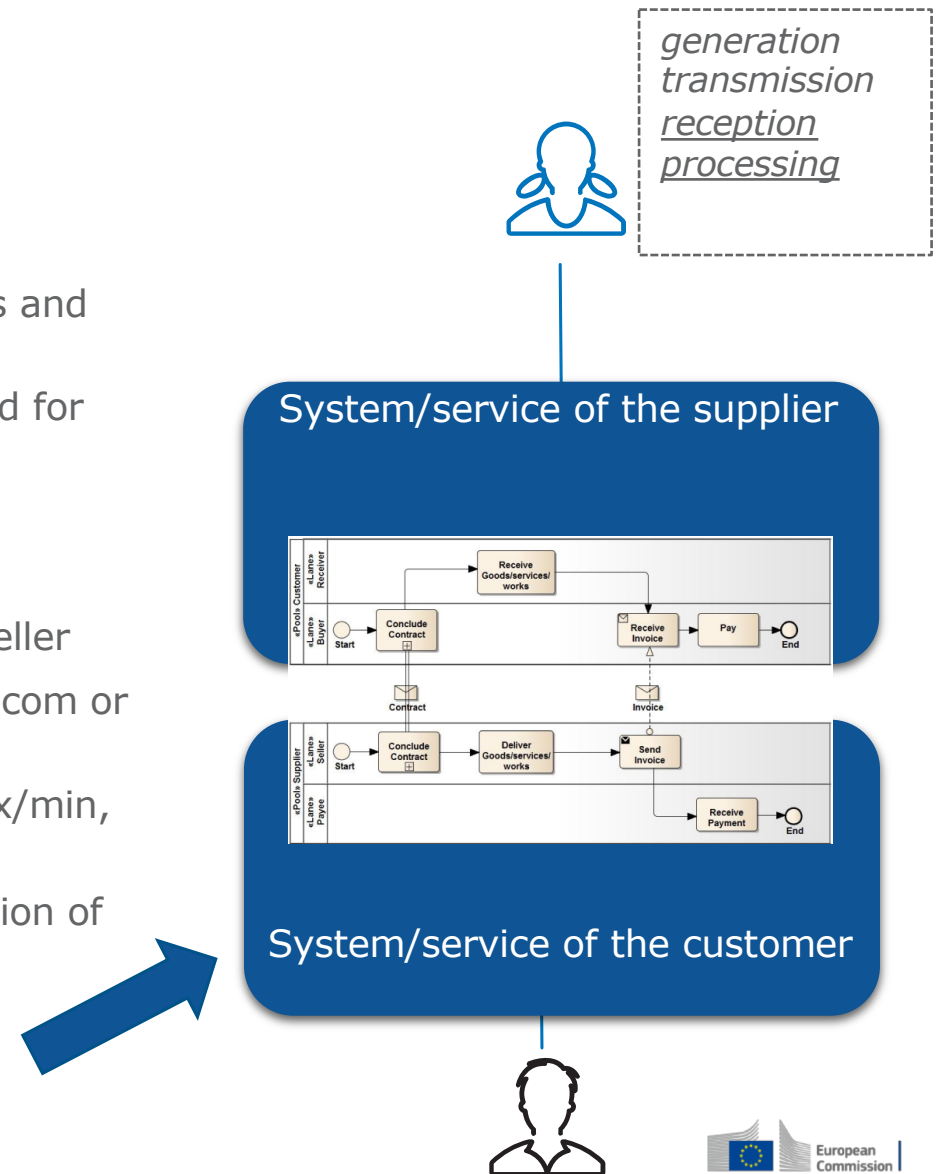

## Buyer process – manual assessment with workflow support

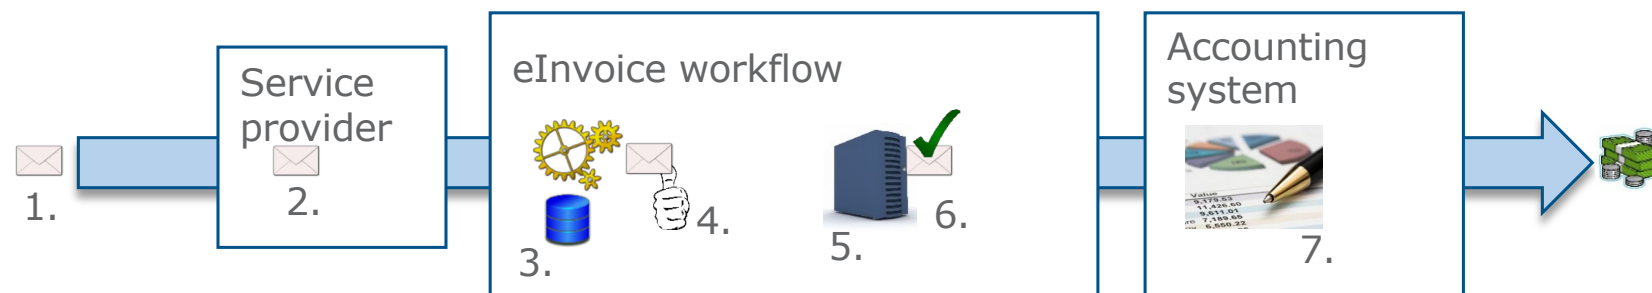

1. The invoice is transmitted from the supplier
2. The invoice is received by the buyer
3. The invoice is routed automatically to the workflow
4. The supplier information is verified
5. There is a buyer reference in the invoice for forwarding in the workflow
6. The invoice is assessed and approved
7. Cost is booked into accounts and payment is initiated

## Straight through invoice processing

- Information in the invoice is used to automatically assess and approve the invoice
- Only invoices deviating from what is expected are marked for manual assessment
- Use of Order reference
  - Refers to a purchase order previously issued by the seller
- Periodical invoices related to subscription, electricity, telecom or other invoice objects
  - Requires an invoice object registry with approved max/min, allowed variances
  - Can result in positive side effects – such as identification of unused phone subscriptions

## Buyer process – straight through processing

1. The invoice is transmitted from the supplier
2. The invoice is received by the buyer
3. The invoice is routed automatically to the workflow
4. The supplier information is verified
5. The invoice has a reference to an order or a registered object (e.g. subscription number, rent object id). Rules for approval is associated with the registered object
6. The invoice is automatically assessed and approved
7. Cost is booked into accounts and payment is initiated

## Roadmap for mass adoption of eInvoicing

---

Success factors from early adopters are

- Policy on standard for format and content
- Policy on transmission technology
- Support available to implementers
- Tools which helps on conformance testing
- Legal requirements

# Examples of things to consider when developing a roadmap for eInvoicing

## For the supplier/issuer – Internal perspective

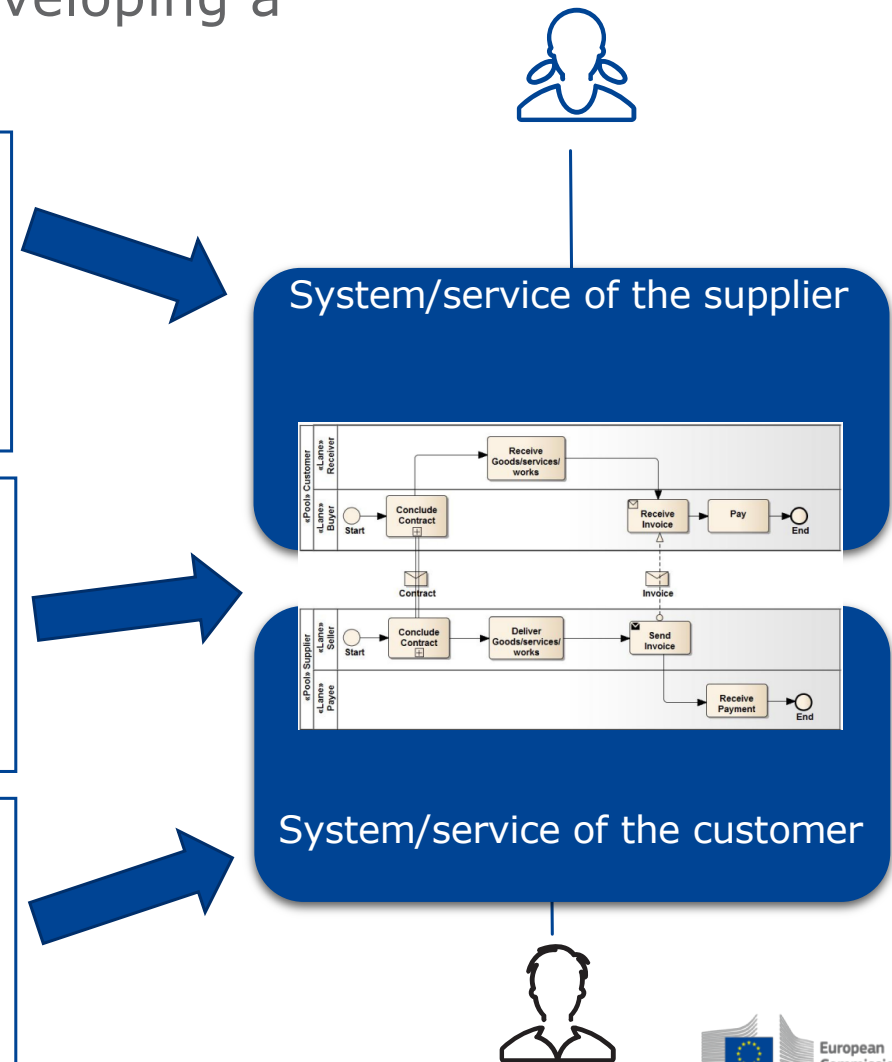

- Suppliers have a diverse environment (such as different technical solutions, processes, maturity level)
- Clear policy around standards helps
- Supporting tools can be provided – validation tools, presentation style sheets, translations
- Aligned requirements on use of references and identifiers if possible

## Interconnectivity – External perspective

- Minimum requirement on technology for how to connect and for service providers to collaborate
- Publicly available strategy on how to handle the European standard – both domestically and cross border (CIUS)
- Transmission cross border (eDelivery)

## For the public sector – Internal perspective

- Up to each entity to tender for solutions or centrally provided?
- Maturity level of the public entities – are temporary solutions necessary?
- Mandate eInvoicing? Through law/contracts? Also below threshold?
- Centrally provided supporting tools, help desk, training and capacity building?

## **Discussion – what measures can be done for these three views**

- 1. Solutions and strategies for suppliers (how to ensure that the suppliers are ready?)**
- 2. Strategies for Transmission/connectivity (eDelivery/PEPPOL, central service, private solutions)**
- 3. Solutions and strategies for the public sector (are the public entities ready?)**

---

# The European Norm and its content

---

**Martin Forsberg**

DIGIT

---

## Initiation of the standardisation

### From article 3

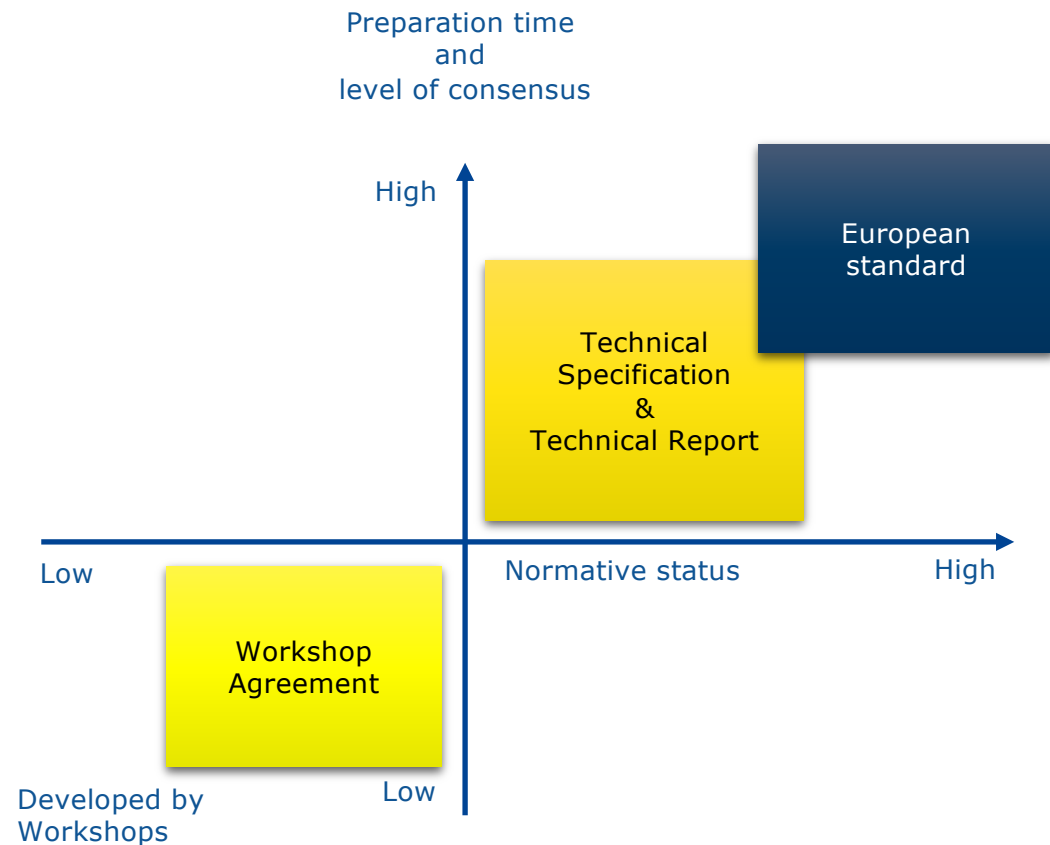

*The Commission shall request that the relevant **European standardisation organisation** draft a European standard for the semantic data model of the core elements of an electronic invoice (the 'European standard on electronic invoicing').*

...

*The Commission shall request that the relevant European standardisation organisation provide a list with a limited number of syntaxes which comply with the European standard on electronic invoicing, the appropriate syntax bindings and guidelines on transmission interoperability, in order to facilitate the use of such standard.*

## CEN/TC 434 was established

- CEN - European Committee for Standardisation
- The work started in a project committee (PC434) but was later changed into a technical committee (TC434)
- TC434 has over 100 committee members from 31 countries
- Participation in the work must go through the national standardisation committees.
- The committee is about to finalize all deliverables defined in the standardisation request

---

## Current status

Number	Title	Status
<b>EN 16931-1</b>	Semantic data model of the core elements of an electronic invoice	Approved!
<b>CEN/TS 16931-2</b>	List of syntaxes that comply with EN 16931-1	Approved!
<b>CEN/TS 16931-3-1</b>	Methodology for syntax bindings of the core elements of an electronic invoice	Approved!
<b>CEN/TS 16931-3-2</b>	Syntax binding for ISO/IEC 19845 (UBL2.1) invoice and credit note	Approved!
<b>CEN/TS 16931-3-3</b>	Syntax binding for UN/CEFACT XML Cross Industry Invoice D16B	Approved!
<b>CEN/TS 16931-3-4</b>	Syntax binding for UN/EDIFACT D16B	Approved!
<b>CEN/TR 16931-4</b>	Guidelines on interoperability of electronic invoices at the transmission level	Approved!
<b>CEN/TR 16931-5</b>	Guidelines on the use of sector or country extensions in conjunction with EN 16931-1, methodology to be applied in the real environment	Approved!
<b>CEN/TR 16931-6</b>	Result of the test of EN 16931-1 with respect to its practical application for an end user	Approved!

# **Introduction to key concepts of the standard**

Electronic invoicing - Part 1: Semantic data model of the  
core elements of an electronic invoice

Facturation électronique - Partie 1: Modèle sémantique  
de données des éléments essentiels d'une facture  
électronique

Elektronische Rechnungsstellung - Teil 1:  
Semantisches Datenmodell der Kernelemente einer  
elektronischen Rechnung

This draft European Standard is submitted to CEN members for formal vote. It has been drawn up by the Technical Committee CEN/TC 434.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning: This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

Section 1-3 - Scope, references, terms & definitions

Section 4 – The concept of a core invoice

Section 5 – Business process to support

Section 6 – The semantic model, rules and data types

Section 7 – Core Invoice Usage Specification (and  
compliance)

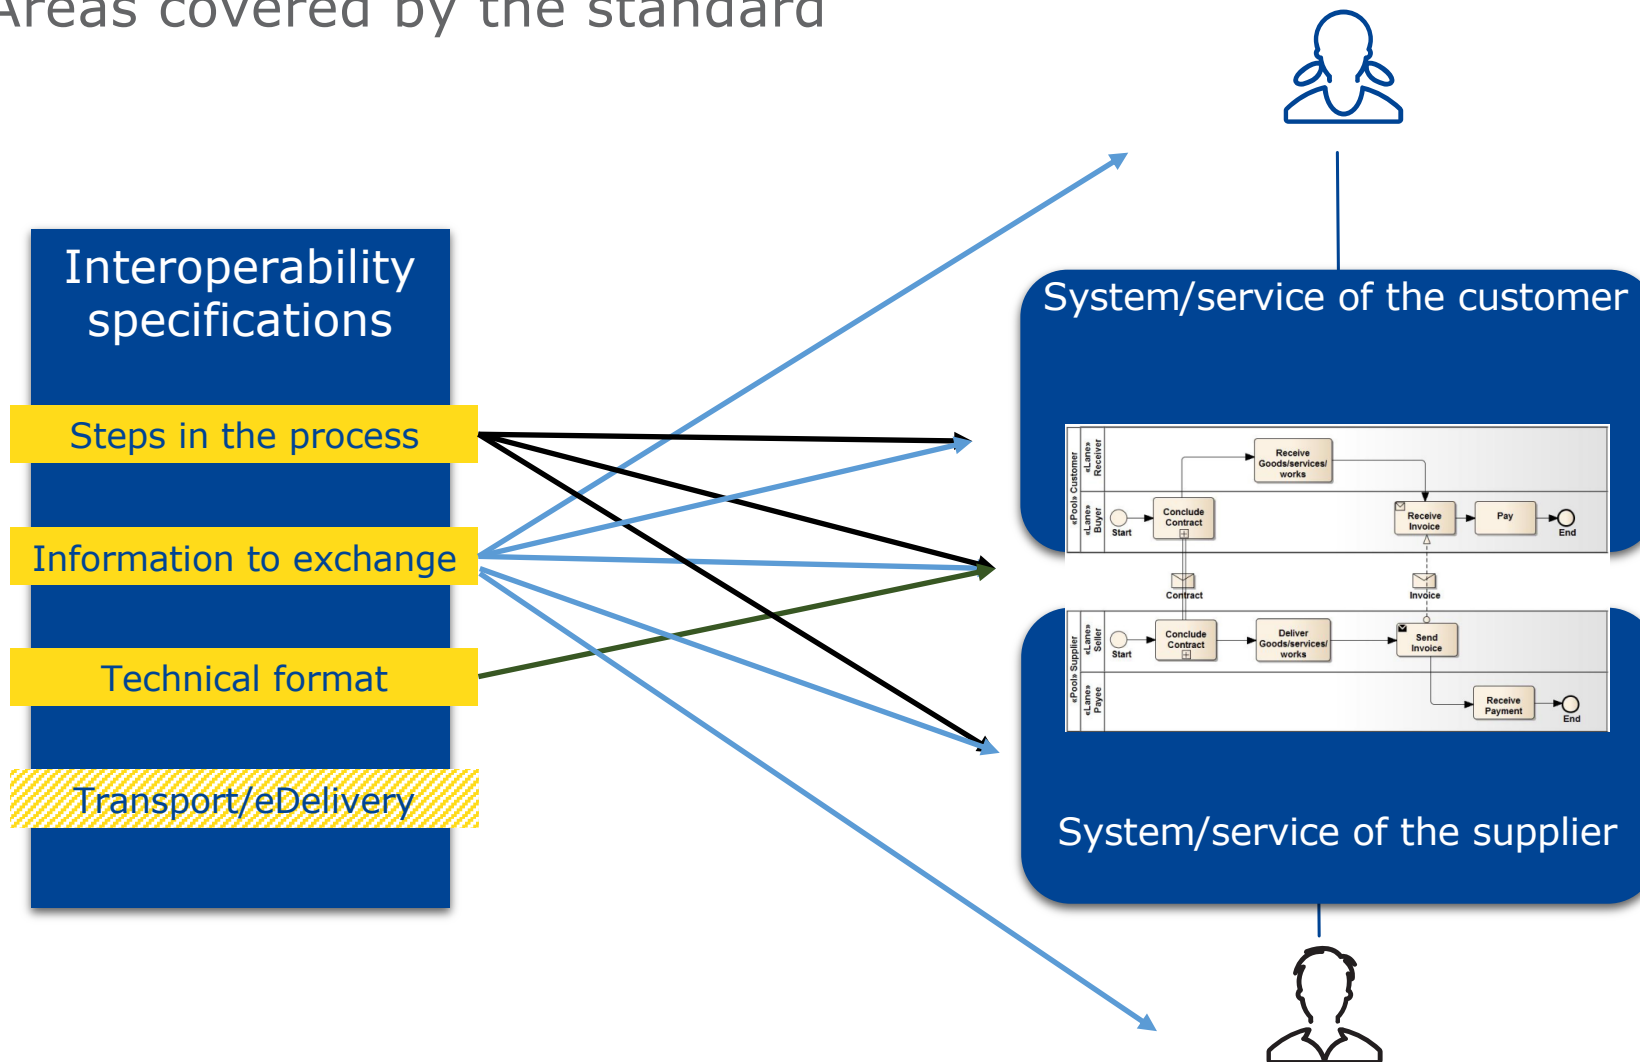

Annex A – Examples (Informative)

Annex B – Assessment of the EN towards the  
Standardization request (Informative)

Annex C – How does the EN meet legal  
requirements (Informative)

Annex D – BPMN symbols (informative)

## Areas covered by the standard

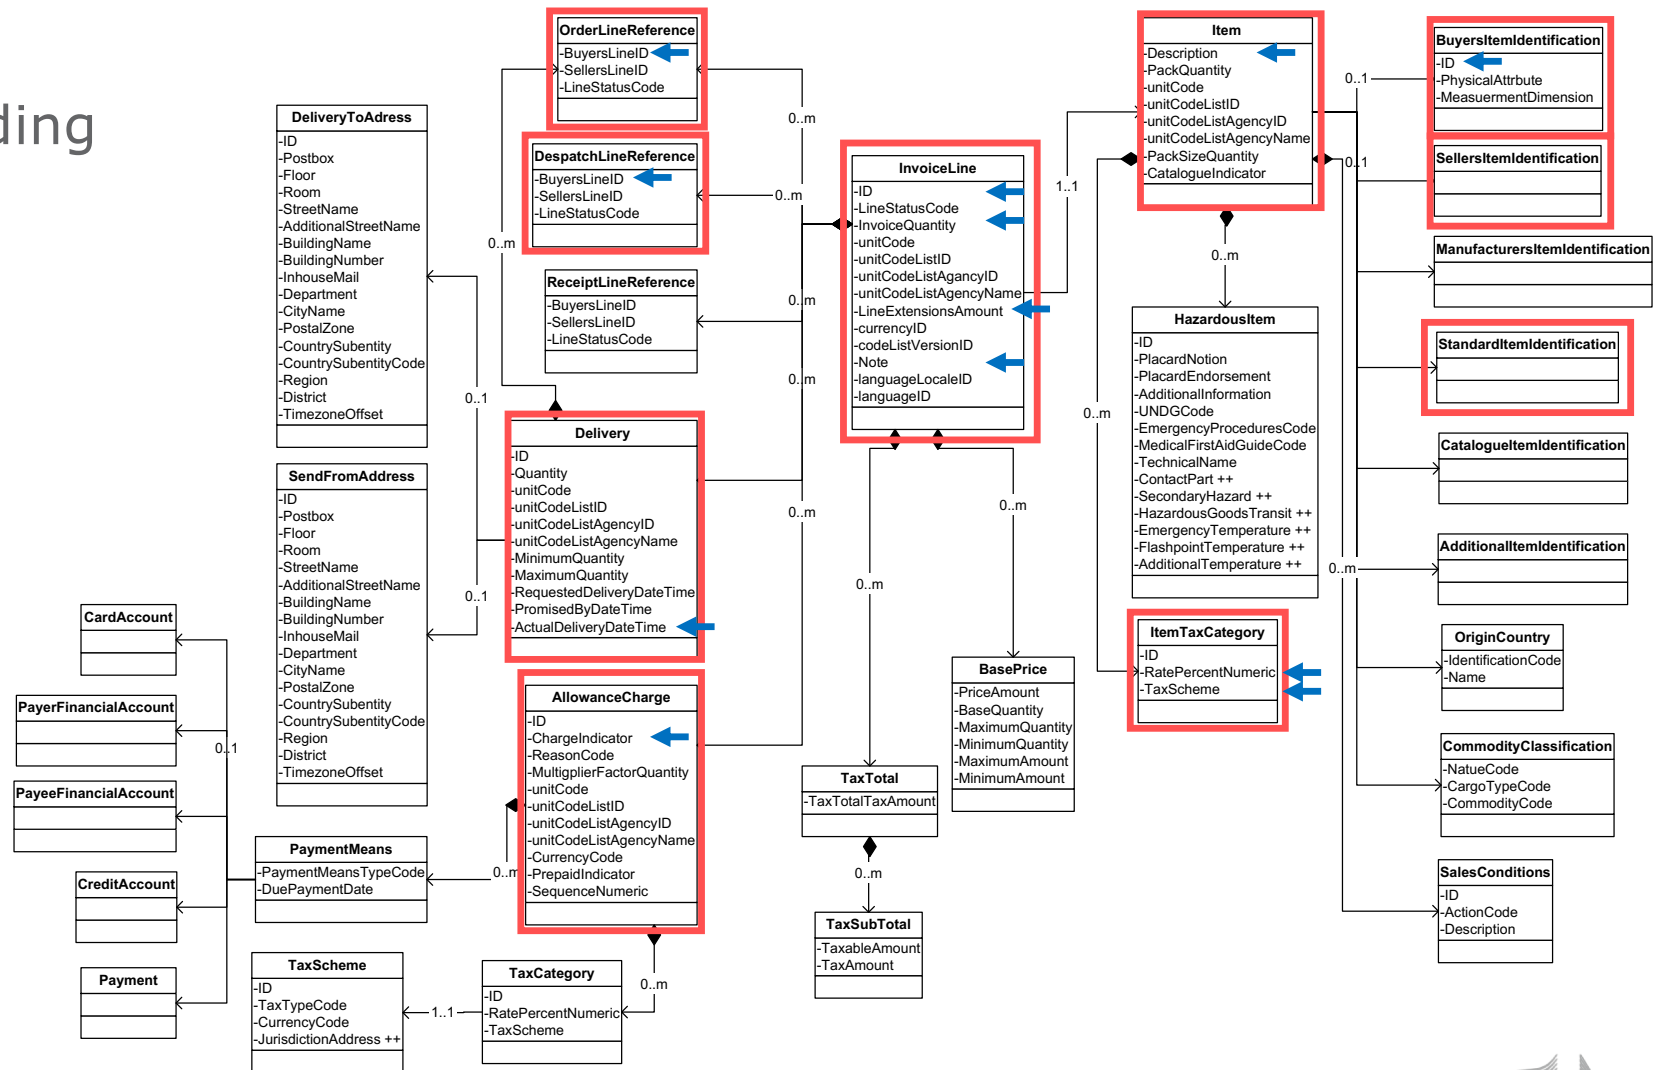

---

## Reasons for a core invoice

The European standard recognises the following reasons:

- Business environment is diverse – also the need for information exchange
- Invoices from different situations may potentially contain many information elements – a complete model becomes very large and complex
- Even if it would technically be possible to have a large model, it would be challenging and costly
- When different countries/industries use subset of large standards, interoperability is hampered and silo-implementations are created

# Common understanding

---

## The concept of a core invoice – How?

The norm identifies a few **guiding principles**:

- It should be easier to use than paper invoicing
- Standardised information elements makes processing more efficient (than paper invoices)
- It should be possible to use without prior consultation or bilateral agreements
- It should contain information to enable efficient and automatic processing
- Software should be able to present all information, and automatically process structured data
- Structured data should result in optimised business processes
- The core invoice model should not make assumptions on the method of creation, delivery or processing
- The core invoice model should not make assumptions on the syntax or transmission technology

---

## Requirement driven approach on defining the model

- Each business term in the model comes from one or more documented (and numbered) requirement
- The requirements give a good understanding of the background

---

## Business processes to support

The invoice model contains information elements to support the following processes

- P1: Invoicing of deliveries of goods and services against purchase orders, based on a contract
- P2: Invoicing deliveries of goods and services based on a contract
- P3: Invoicing the delivery of an incidental purchase order
- P4: Pre-payment
- P5: Spot payment
- P6: Payment in advance of delivery
- P7: Invoices with references to a despatch advice
- P8: Invoices with references to a despatch advice and a receiving advice
- P9: Credit notes or invoices with negative amounts, issued for a variety of reasons including the return of empty packaging
- P10: Corrective invoicing (cancellation/correction of an invoice)
- P11: Partial and final invoicing
- P12: Self billing

**EN 16931-1:2017 Chapter 5.2.1**

© CEN, reproduced with permission

## Business requirements derived from the processes

- Based on the identified processes and listed invoice functions, requirements are defined
- Each requirement has an assigned identifier

- R5 information to trace to a single related purchase order from the document level (all processes, except P2 and P5);
- R6 information to trace to a single related purchase order line from the invoice line (all processes, except P2 and P5);
- R7 information to trace to a single contract and the underlying call for tenders from the document level (all processes, except P3 and P5);

## Examples of key components

Invoice (header)  
 Invoice number (1..1)  
 Issue date (1.1)  
 Type code (1..1)  
 Currency code (1..1)  
 ....

Seller information  
 Name (1..1)  
 Trading name (0..1)  
 Identifier (0..n)  
 Legal registration identifier (0..1)  
 VAT number (0..1)  
 Additional information (0..1)

Payment instructions  
 Payment means type code (1..1)  
 Payment means text (0..1)  
 Additional information (0..1)

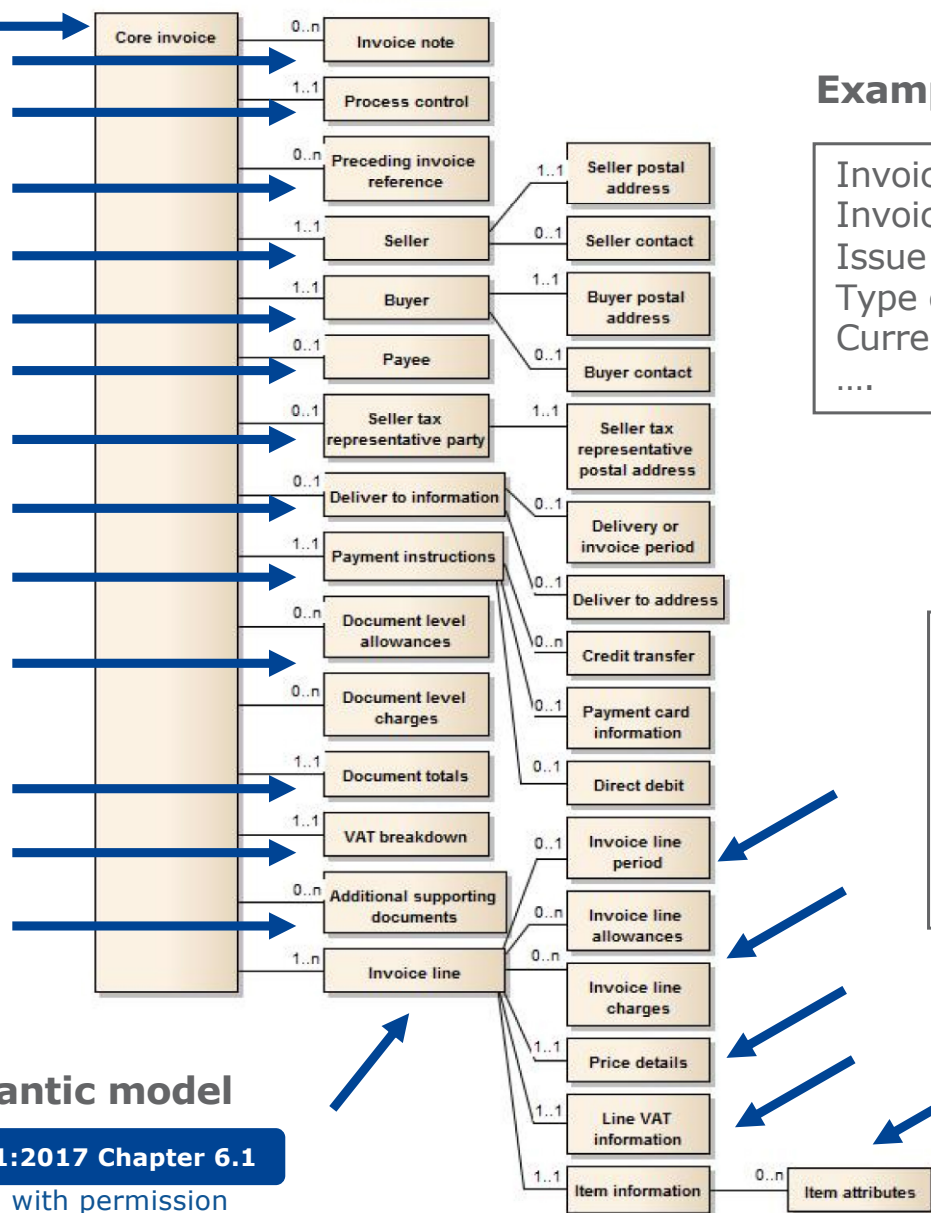

VAT Breakdown  
 Category taxable amount (1..1)  
 Category tax amount (1..1)  
 Category code (1..1)  
 Category rate (1..1)  
 Exemption text (0..1)  
 Exemption code (0..1)

Item information  
 Name (1..1)  
 Description (0..1)  
 Sellers identifier (0..1)  
 Buyers identifier (0..1)  
 Standard identifier (0..1)  
 Item classification (0..n)  
 Country of origin (0..1)

## The semantic model

EN 16931-1:2017 Chapter 6.1

© CEN, reproduced with permission

## Examples of business terms

ID	Level	Cardinality	Business Term	Description	Usage Note	Req. ID	Semantic data type <sup>2</sup>
BT-1	+	1..1	Invoice number	A unique identification of the Invoice.	The sequential number required in Article 226(2) of the directive 2006/112/EC [2], to uniquely identify the Invoice within the business context, time-frame, operating systems and records of the Seller. It may be based on one or more series of numbers, which may include alphanumeric characters. No identification scheme is to be used.	R56	Identifier
BT-2	+	1..1	Invoice issue date	The date when the Invoice was issued.		R56	Date
BT-3	+	1..1	Invoice type code	A code specifying the functional type of the Invoice.	Commercial invoices and credit notes are defined according the entries in UNTDID 1001 [6]. Other entries of UNTDID 1001 [6] with specific invoices or credit notes may be used if applicable.	R44	Code

**ID** – Unique id for each business term

**Level** – indicates depth in model (+, ++, +++, +++)

**Cardinality** – Indicates optionality, repetitions allowed

**Business term** – name of the business term

**Description** – short description/definition

**Usage note** – guiding/explanatory information

**Req id** – reference to underlying requirement

**Data type** – the type of

# Semantic datatypes

## Primitive types

- Binary
- Date
- Decimal
- String

Primitive types used in

## Semantic datatypes

- Amount (two decimals)
- Unit Price Amount
- Quantity
- Percentage
- Identifier
- Document reference
- Code
- Date
- Text
- Binary object

**Data types can have supplementary components/attributes**

Component	Use	Primitive Type	Example
Content	Mandatory	Binary	
Mime Code	Mandatory	String	"image/jpeg"
Filename	Mandatory	String	"drawing5.jpg"

A Receiver of an Invoice, conformant to this document shall accept and process attachments that are of the following mime types (commonly used file extensions are added between brackets):

- application/pdf (.pdf)
- image/png (.png)
- image/jpeg (.jpg)
- text/csv (.csv)
- application/vnd.openxmlformats-officedocument.spreadsheetml.sheet (.xlsx)
- application/vnd.oasis.opendocument.spreadsheet (.ods)

## Business rules

- Conditions – dependencies between terms
- Integrity constraints (In many cases, the data model cardinality indicates the same thing)

ID	Description	Target / context	Business term / group
BR-CO-8	Invoice line charge reason code and Invoice line charge reason shall indicate the same type of charge reason.	Invoice Charges line	BT-144, BT-145
BR-CO-9	The Seller VAT identifier, Seller tax representative VAT identifier, Buyer VAT identifier shall have a prefix in accordance with ISO code ISO 3166-1 alpha-2 by which the country of issue may be identified. Nevertheless, Greece may use the prefix 'EL'.	VAT identifiers	BT-31, BT-48, BT-63
BR-CO-10	Sum of Invoice line net amount = $\sum$ Invoice line net amount.	Document totals	BT-106

**ID** – Unique id for each business rule

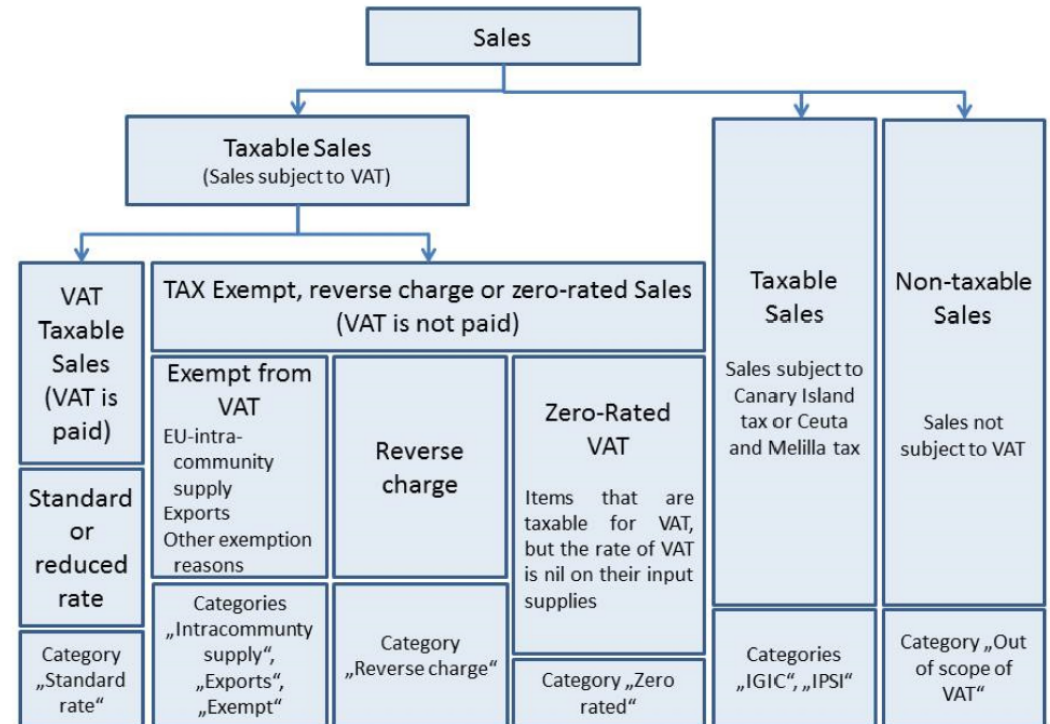

**Description** – textual description of the rule

**Target/Context** – the cgroup/class for where the rule applies

**Business term/group** – reference to the term for which the rule applies

## Business rules – VAT Rules

- VAT Rules – Rules for each VAT category

ID	Description
BR-Z-1	An Invoice that contains a line, a document level allowance where the Invoiced item VAT category code (BT-151, BT-152) shall contain in the VAT breakdown (BG-23) exactly one equal with “Zero rated”.
BR-Z-2	An Invoice that contains a line where the Invoiced item VAT category code (BT-151) is “Zero rated” shall contain the Sellers VAT Identifier (BT-31), the Seller Tax registration identifier (BT-32) or the Seller tax representative VAT identifier (BT-63).
BR-Z-3	An Invoice that contains a document level allowance where the Invoiced item VAT category code (BT-95) is “Zero rated” shall contain the Sellers VAT Identifier (BT-31), the Seller Tax registration identifier (BT-32) or the Seller tax representative VAT identifier (BT-63).

## Access to the specifications

<a href="#">CEN/TS 16931-3-4:2017</a> (WI=00434010) Electronic invoicing - Part 3-4: Syntax binding for UN/EDIFACT INVOIC D16B	2017-10-18	
<a href="#">EN 16931-1:2017</a> (WI=00434001) Electronic invoicing - Part 1: Semantic data model of the core elements of an electronic invoice	2017-06-28	

**Examples of questions  
which the standard gives  
answers to**

**Which document types can be attached  
to an invoice?**

**Which element should be used for a reference to the customer, similar to "Your reference" in a paper invoice?**

**We use “Reverse Charge” VAT. Should  
the Tax Amount always be 0?**

---

# **Syntaxes which comply with the European standard on e-invoicing**

---

**Martin Forsberg**  
DIGIT

---

## Many syntaxes – a problem?

- There are a large number of syntaxes in use
- Many communities are already using e-invoicing since a long time
- Use of many syntaxes result in interoperability problems

(9)

In order to further simplify the use of electronic invoicing and to reduce costs, one of the long-term objectives should be to **limit the number of syntaxes used**, preferably by concentrating on those most commonly used.

Article 3

Establishment of a European standard

...

The Commission shall request that the relevant European standardisation organisation **provide a list with a limited number of syntaxes** which comply with the European standard on electronic invoicing, the appropriate syntax bindings and guidelines on transmission interoperability, in order to facilitate the use of such standard.

Article 7

Receipt and processing of electronic invoices

Member States shall ensure that contracting authorities and contracting entities receive and process electronic invoices which comply with the European standard on electronic invoicing whose reference has been published pursuant to Article 3(2) and with **any of the syntaxes on the list** published pursuant to Article 3(2).

---

## The standardization request from EC defined a number of criteria

### Req ID Requirement of sub-requirement

1	Comply with the core invoice semantic data model specified in the EN
2	Be international, open and free to use
3	Have a governance and sustainability model
3.1	There is an established organisation maintaining the syntax (format)
3.2	There is a maintenance process that is: <ul style="list-style-type: none"><li>- documented with defined participation and voting rules;</li><li>- governed;</li><li>- open to participation for stakeholders.</li></ul>
3.3	There is a funding model allowing further development and maintenance.
3.4	Support can be provided (consulting, educating, training) to solution providers (implementers) or users (companies, PAs etc.).
4	Be part of a coherent set of standards and technical specifications to support the broader e-procurement process or the broader e-invoicing supply chain
5	Be widely used in the EU or worldwide
6	Be used in production environments (and not just test) by both the public and the private sector
7	Reflect well-accepted technology and aim to incorporate the latest technological developments considered to be state of the art
8	Have guidelines, code lists, validating tools freely available to ease implementation by ICT vendors and suppliers
9	Have a set of official, freely available syntax-dependent artefacts for validation (the XML Schema or Schematron) to support tool independent validation
10	Have an official updating and versioning strategy that takes due account of backward compatibility, as well as appropriate guidelines for customisation that explain how to extend and restrict the syntax

## Syntax bindings

---

# OASIS Universal Business Language 2.1

- UBL stands for Universal Business Language
- OASIS UBL 2.1 is developed and maintained by the UBL Technical Committee within OASIS
- UBL is an ISO-standard (ISO/IEC 19845-2015)
- UBL was developed with starting point in the CBL/xCBL format
- Sweden and Denmark early adopters around 2003-2004

---

## Cross Industry Invoice D16B

- CII stands for Cross Industry Invoice
- CII is developed and maintained by UN/CEFACT
- UN/CEFACT serves as the focal point for trade facilitation recommendations and electronic business standards, covering both commercial and government business processes that can foster growth in international trade and related services.
- UN/CEFACT develops and maintains UN/EDIFACT, XML Schemas, Code lists and a number of UNECE Recommendations (such as Recommendation N°. 20 - Codes for Units of Measure)

# Syntax binding specifications

## Syntax binding – Semantic model → Syntax

ID	Level	Card.	BT	Desc.	DT	Path	Type	Card.	Match	Rules
BT-1	1	1..1	Invoice number	A unique identification of the Invoice.	I	/Invoice/cbc:ID	I	1..1		
BT-2	1	1..1	Invoice issue date	The date when the Invoice was issued.	D	/Invoice/cbc:IssueDate	D	1..1		
BT-3	1	1..1	Invoice type code	A code specifying the functional type of the Invoice.	C	/Invoice/cbc:InvoiceTypeCode	C	0..1	CAR-2	
BT-5	1	1..1	Invoice currency code	The currency in which all Invoice amounts are given, except for the Total VAT amount in accounting currency.	C	/Invoice/cbc:DocumentCurrencyCode	C	0..1	CAR-2	
BT-6	1	0..1	VAT accounting currency code	The currency used for VAT accounting and reporting purposes as accepted or required in the country of the Seller.	C	/Invoice/cbc:TaxCurrencyCode	C	0..1	SEM-2	

## Syntax binding – Syntax → Semantic model

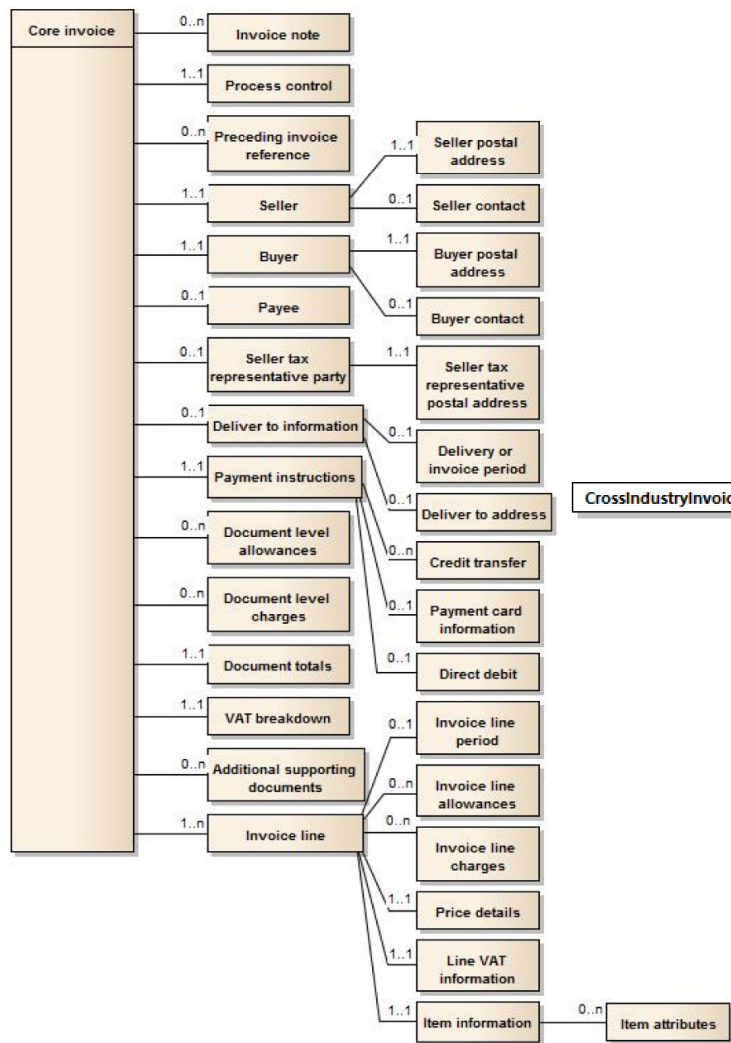

Path	Card.	ID	Level	Card.	BT	Desc.	DT
/Invoice							
/Invoice/cbc:CustomizationID	0..1	BT-24	2	1..1	Specification identifier	An identification of the specification containing the total set of rules regarding semantic content, cardinalities and business rules to which the data contained in the instance document conforms.	I
/Invoice/cbc:ProfileID	0..1	BT-23	2	0..1	Business process type	Identifies the business process context in which the transaction appears, to enable the Buyer to process the Invoice in an appropriate way.	T
/Invoice/cbc:ID	1..1	BT-1	1	1..1	Invoice number	A unique identification of the Invoice.	I
/Invoice/cbc:IssueDate	1..1	BT-2	1	1..1	Invoice issue date	The date when the Invoice was issued.	D
/Invoice/cbc:DueDate	0..1	BT-9	1	0..1	Payment due date	The date when the payment is due.	D
/Invoice/cbc:InvoiceTypeCode	0..1	BT-3	1	1..1	Invoice type code	A code specifying the functional type of the Invoice.	C

---

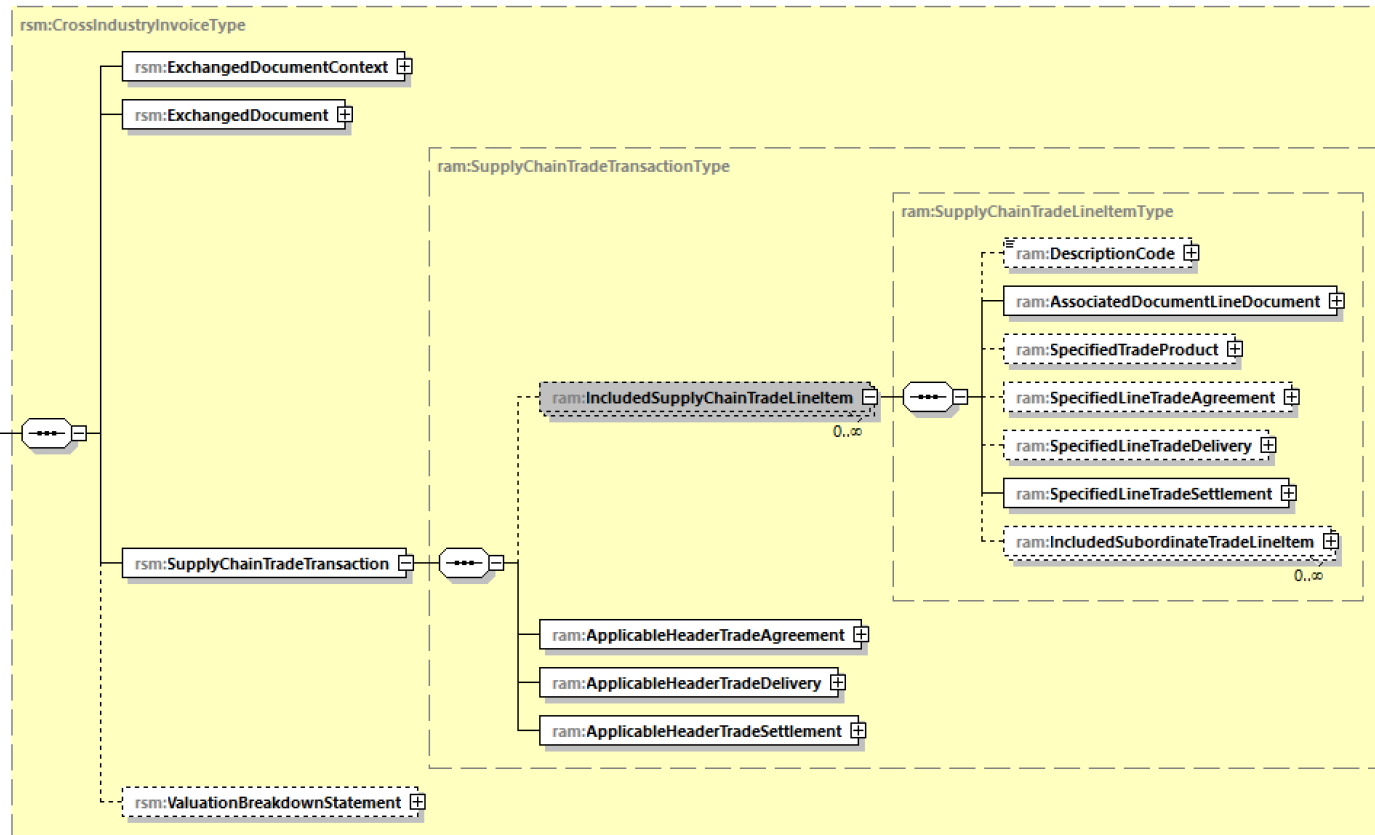

## Not a simple pair matching game

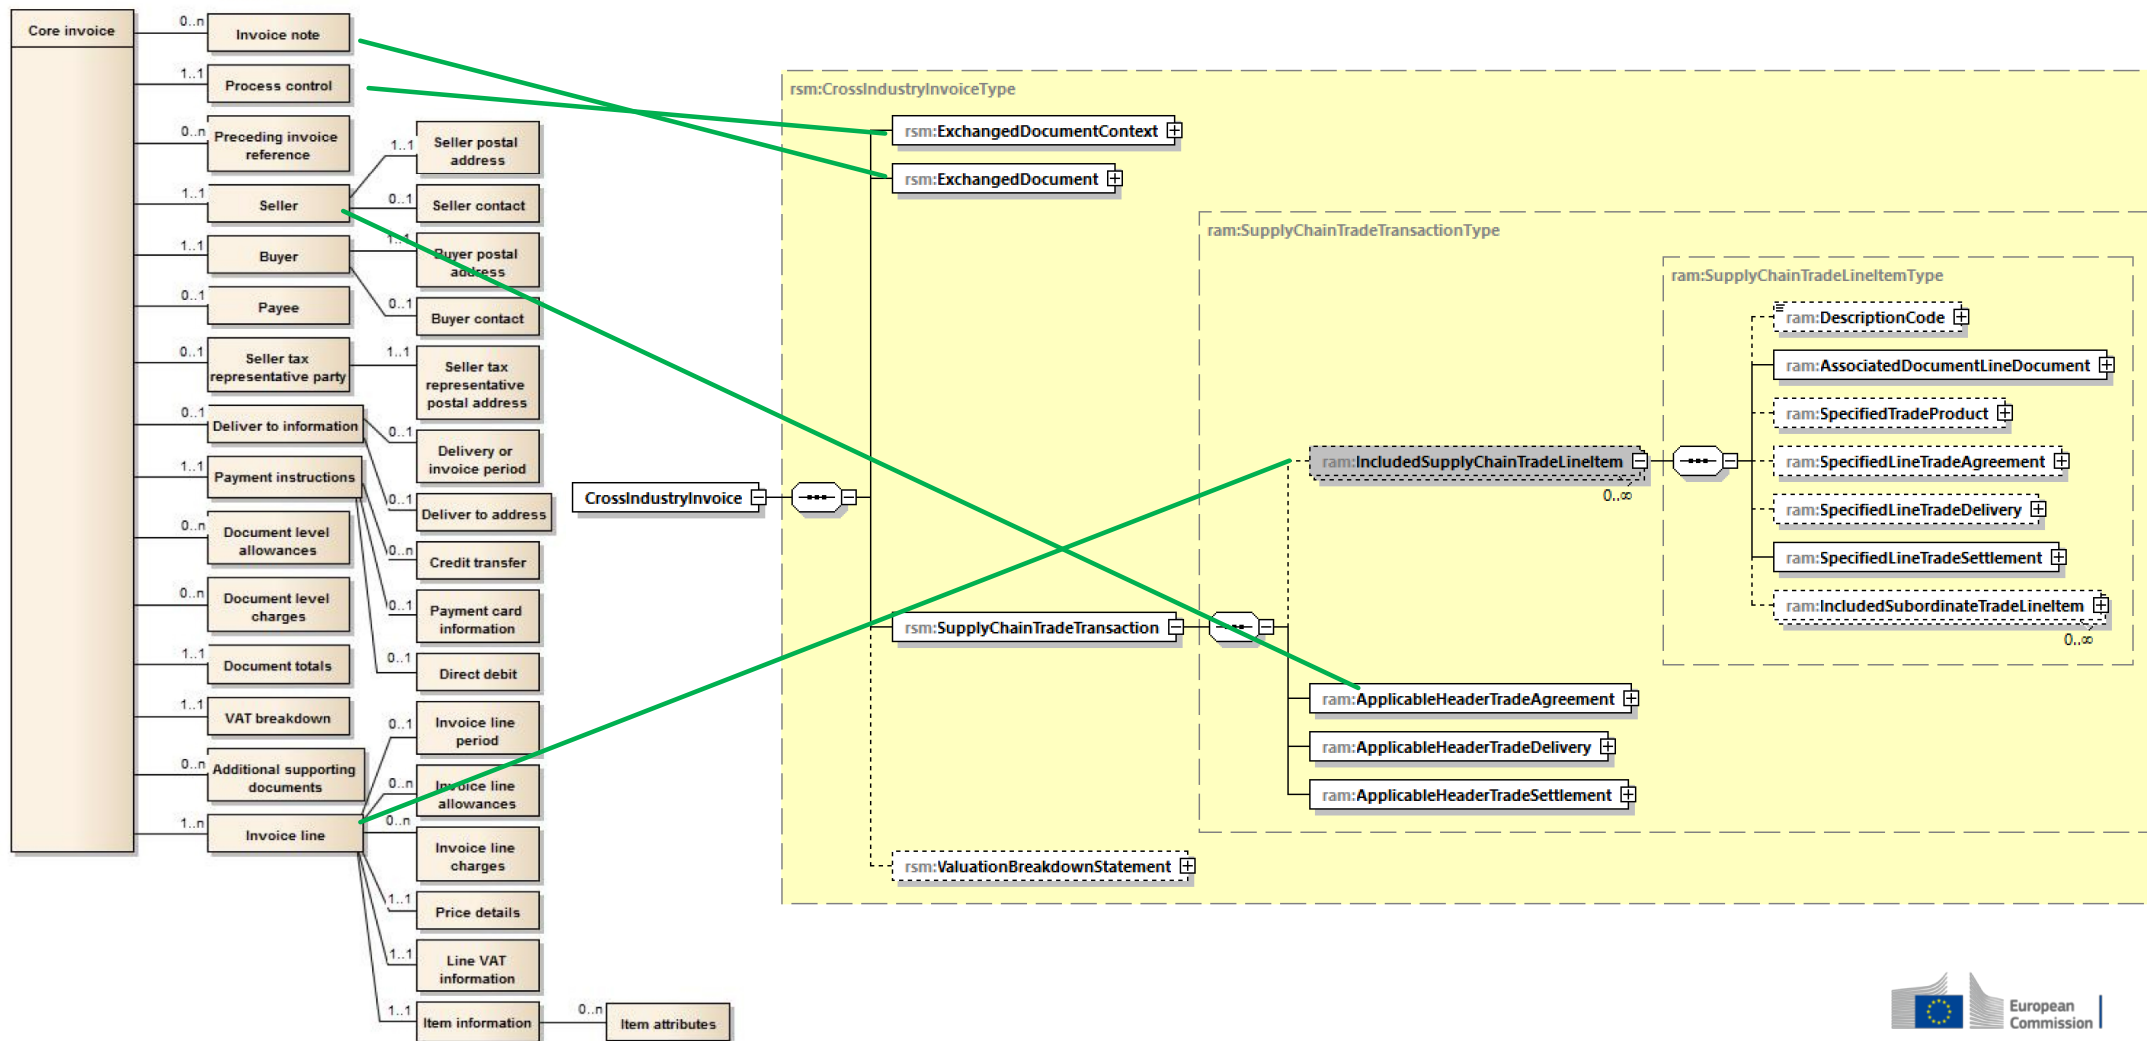

- Not all business terms can be mapped to a single element, often qualifiers are necessary
- The syntaxes have different structures and order of elements
- The syntaxes may have different cardinalities or even datatypes
- The syntax mappings have additional and separate validation rules

# Usage specifications and compliance

---

**Martin Forsberg**  
DIGIT

---

## Compliance and conformance - The European standard defines these concepts

### **Compliant**

some or all features of the core invoice model are used and all rules of the core invoice model are respected

Core Invoice Usage Specifications

### **Conformant**

all rules of the core invoice model are respected and some additional features not defined in the core invoice model are also used

Extensions

### **From article 7 in the directive**

#### ***Receipt and processing of electronic invoices***

*Member States shall ensure that contracting authorities and contracting entities receive and process electronic invoices which **comply** with the European standard on electronic invoicing whose reference has been published pursuant to Article 3(2) and with any of the syntaxes on the list published pursuant to Article 3(2).*

---

Core – something in common

**IMPORTANT**

An invoice which follows a CIUS  
MUST ALWAYS also be compliant  
towards the (non-restricted)  
norm.

---

## Requirements for the contracting authorities/entities

### From article 7

#### ***Receipt and processing of electronic invoices***

*Member States shall ensure that contracting authorities and contracting entities **receive and process electronic invoices which comply with the European standard on electronic invoicing** whose reference has been published pursuant to Article 3(2) and with any of the syntaxes on the list published pursuant to Article 3(2).*

---

## Claiming compliance towards the norm

### ***Compliance of sending or receiving party***

*A receiving party may only claim compliance to the core invoice model if he accepts invoices that comply with the core invoice model in general, **or with a CIUS**, that is itself compliant with the core invoice model.*

---

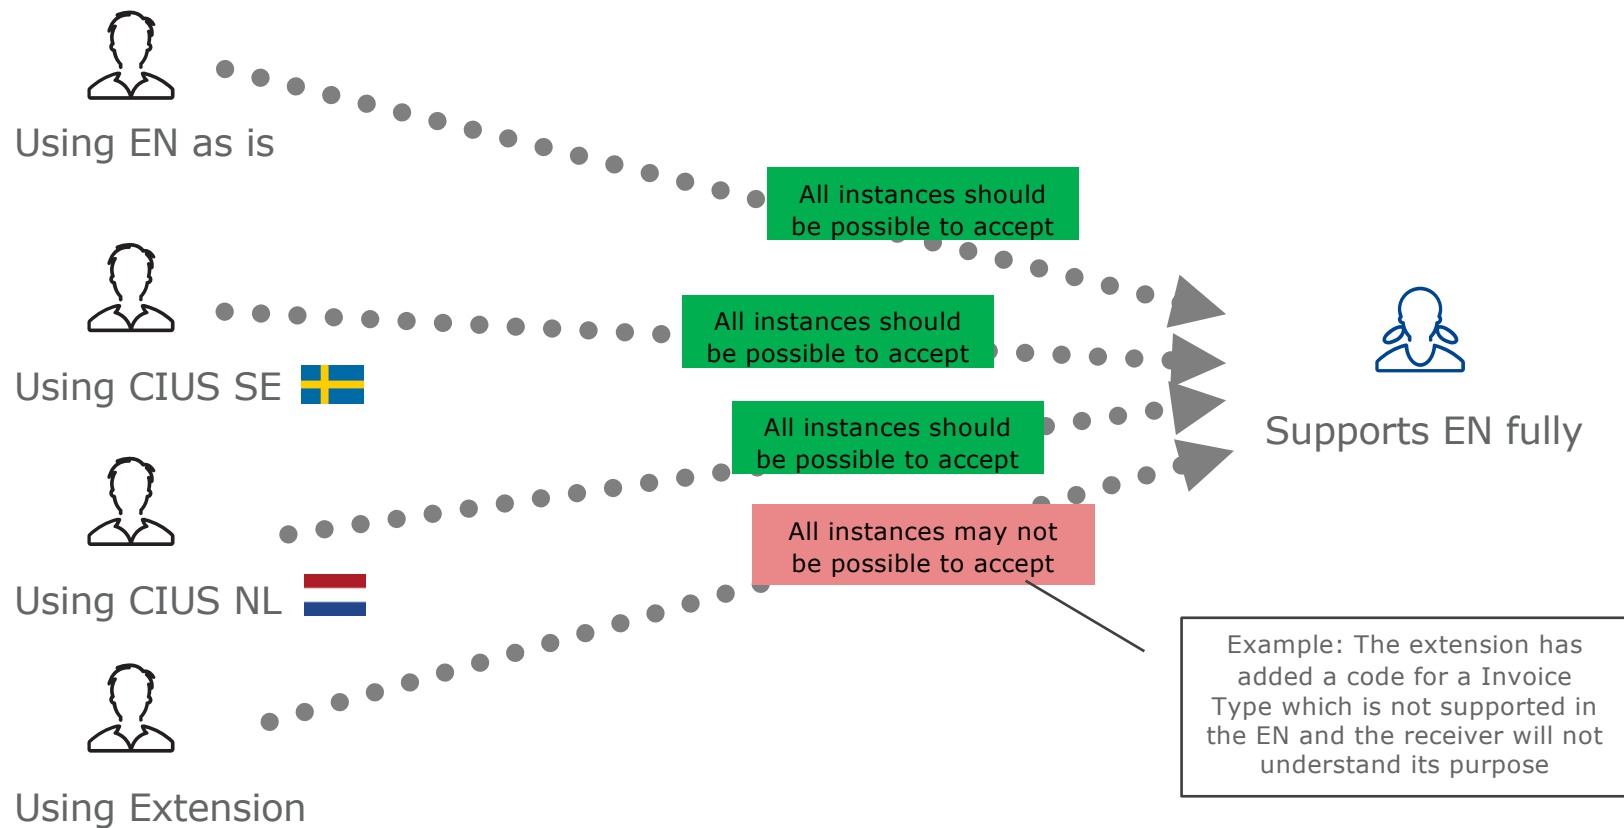

## What is allowed to restrict in a Core Invoice Usage Specification

- "Forbid" optional elements 0..n/0..1 → 0..0
- Make definition narrower
- Add synonyms or explanatory text
- Make optional element mandatory
- Limit allowed number of repetitions
- Change data type to narrower representation (alphanumeric → numeric)
- Limited allowed code values
- Add additional business rules or make existing more restrictive
- Restrict field lengths
- Require certain formatting on values
- Restrict number of decimals/fractions

### **IMPORTANT**

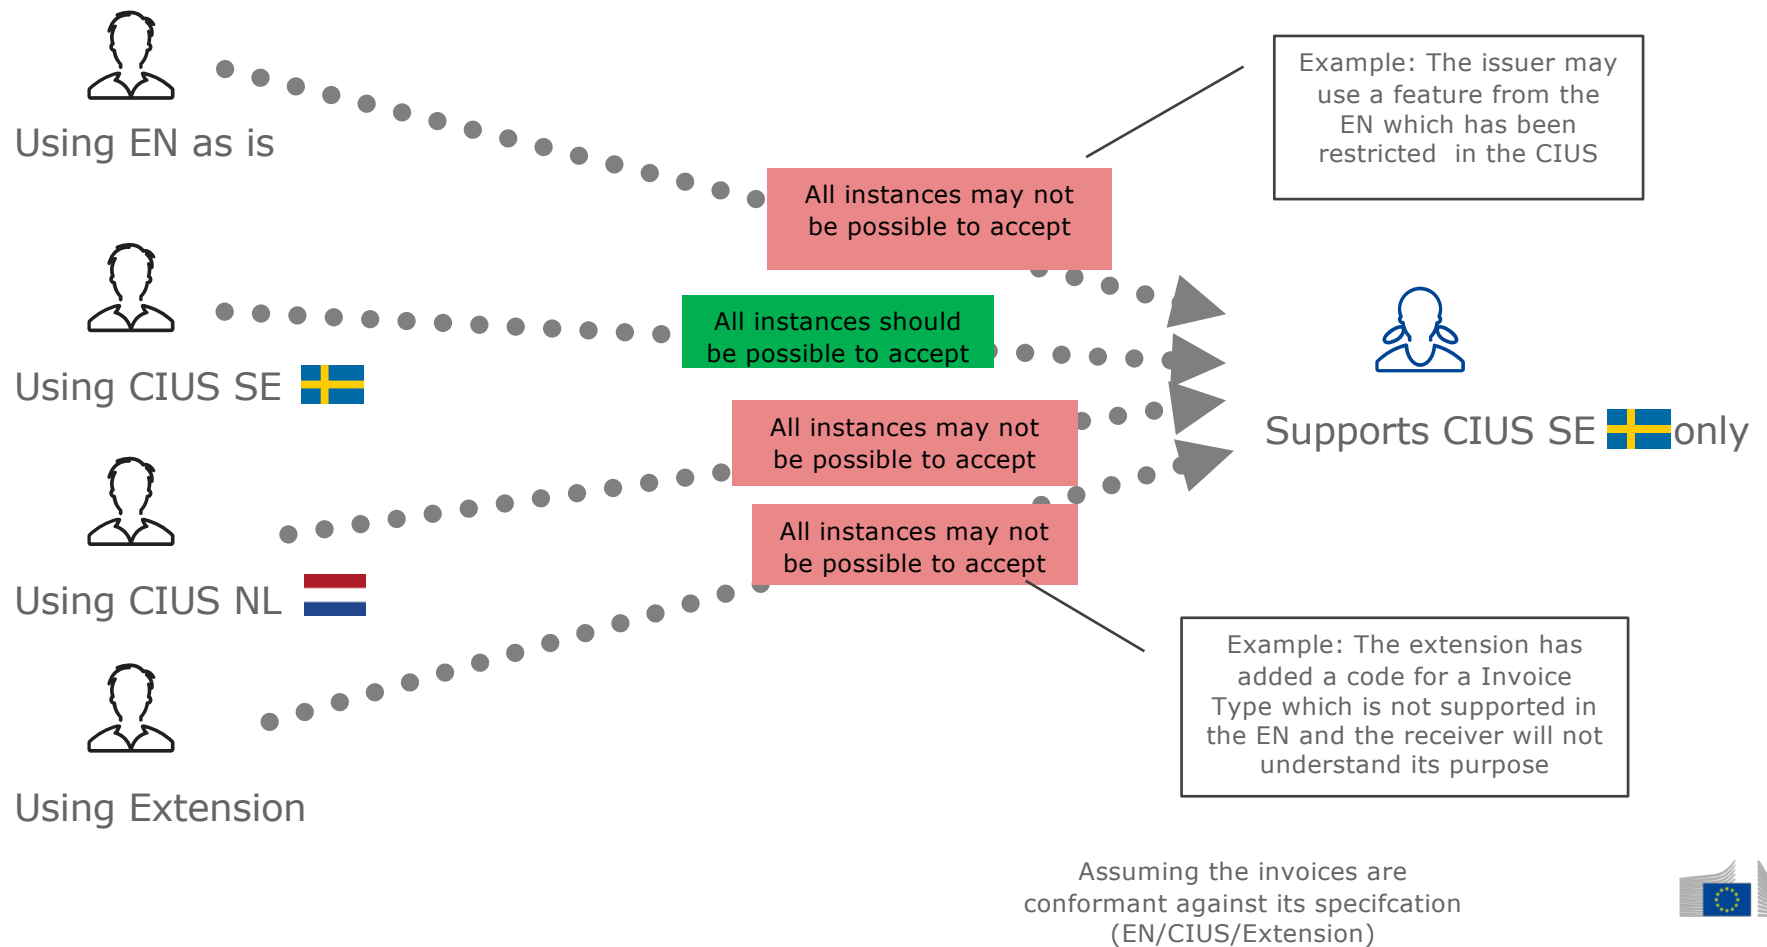

An invoice which follows a CIUS MUST ALWAYS also be compliant towards the (non-restricted) norm.

## A few scenarios

Assuming the invoices are  
conformant against its specification  
(EN/CIUS/Extension)

## A few more scenarios

Community-driven Registry of CIUS (Core Invoice Usage Specifications) and Extensions

Created by Ines COSTA, last modified by Lutz RABE on Oct 02, 2017

Topic	Registry of CIUS (Core Invoice Usage Specifications) and Extensions
Excerpt	This page aims to give the eInvoicing community the opportunity to share the ongoing and planned initiatives across Member States and sectors to create CIUS and Extensions on the European standard on eInvoicing.
Status	OPEN
Deadline	Ongoing

Provide information on CIUS and Extensions

The table below aims to give the eInvoicing community the opportunity to share the ongoing and planned initiatives across Member States and sectors to create CIUS and Extensions on the European standard on eInvoicing. The content is community-driven and the contributors take the sole responsibility of the information shared. Please note that the information available does not have an authoritative character.

We invite you to contribute to build on the information available about the CIUS and Extensions on the European standard on eInvoicing by filling the table below:

Name	Type	Country	Sector	Purpose of the CIUS or Extension	Publisher	Governor	Underlying specification	Further info	Status	Contact
OpenPEPPOL BIS 3.0 5A	CIUS	Any	Any	Restricts the business process scope of the EN with reference to BIS2 business processes.	OpenPEPPOL	OpenPEPPOL	EN16931	<a href="https://peppol.eu/downloads/post-award/">https://peppol.eu/downloads/post-award/</a>	DEVELOPMENT	@Olav Astad KRISTIANSEN

## General rules and country-qualified rules

- A **general rule** applies for all invoices
  - The rule is triggered by the existence of a specific business term

Rule text from the standard

In an Invoice line where the Invoice item VAT category code (BT-151) is "Export outside the EU" the Invoiced item VAT rate (BT-152) shall be 0 (zero).

Context (what triggers the rule)

Existence of

***InvoiceLine/Item/ClassifiedTax/CategoryCode='XYZ'***

Example rule text from a CIUS

The Seller Name must not have more than 50 characters

Context (what triggers the rule)

Existence of

***Seller/Name***

- A **country-qualified rule** applies only for invoices issued in a specific country
  - The rule is triggered by the given country code of the seller

Example rule text from a Country specific CIUS

When the Seller is Swedish, the Legal Registration Number must be numeric with 10 digits.

Context (what triggers the rule)

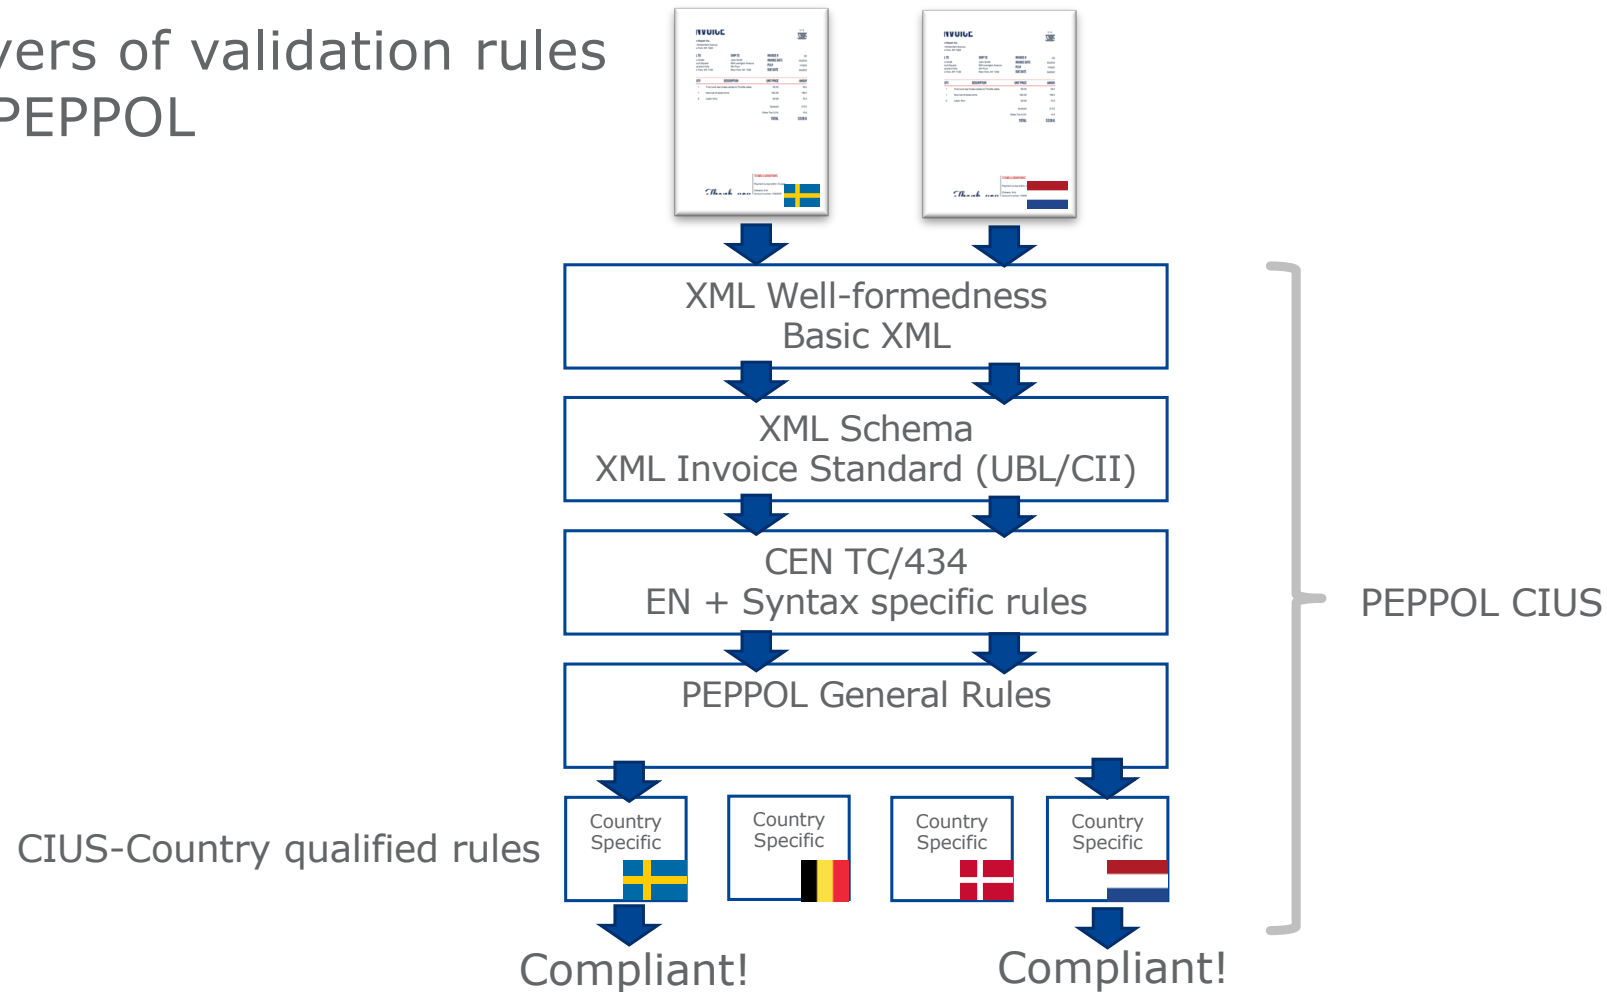

Existence of

***Seller/Address/CountryCode='SE'***

***AND existence of***

***Seller/LegalRegistrationNumber***

## Layers of validation rules in PEPPOL

## National rules in PEPPOL CIUS

To avoid creation of national CIUS'es:

- affected based on the country of the seller.
- Don't affect invoices issued in other countries.
- PEPPOL Authority responsible

### Appendix C: National rules

The following rules have been defined by PEPPOL Authorities in addition to the rules for [PEPPOL BIS](#) in general. These rules are affected based on the country of the seller, and **will not affect invoices issued in other countries**. They apply in **all** profiles that use this transaction specification.

National rules are provided by each country's PEPPOL Authority, and if you need any changes or additions to these rules, please contact your PEPPOL Authority.

*Table 18. National transaction business rules*

Rule	Message/Context/Test
DK-R-001 (warning)	<b>For Danish suppliers when the Accounting code is known, it should be referred on the Invoice.</b>
	ubl-creditnote:CreditNote   ubl-invoice:Invoice
	not(cac:AccountingSupplierParty/cac:Party/cac:PostalAddress/cac:Country/cbc:IdentificationCode = 'DK' and (normalize-space(cbc:AccountingCost/text()) = ''))
DK-R-002 (fatal)	<b>Danish suppliers MUST provide legal entity (CVR-number).</b>
	ubl-creditnote:CreditNote   ubl-invoice:Invoice
	not(cac:AccountingSupplierParty/cac:Party/cac:PostalAddress/cac:Country/cbc:IdentificationCode = 'DK' and (normalize-space(/cac:AccountingSupplierParty/cac:Party/cac:PartyLegalEntity/cbc:CompanyID/text()) = ''))

---

## Example - Swedish rules

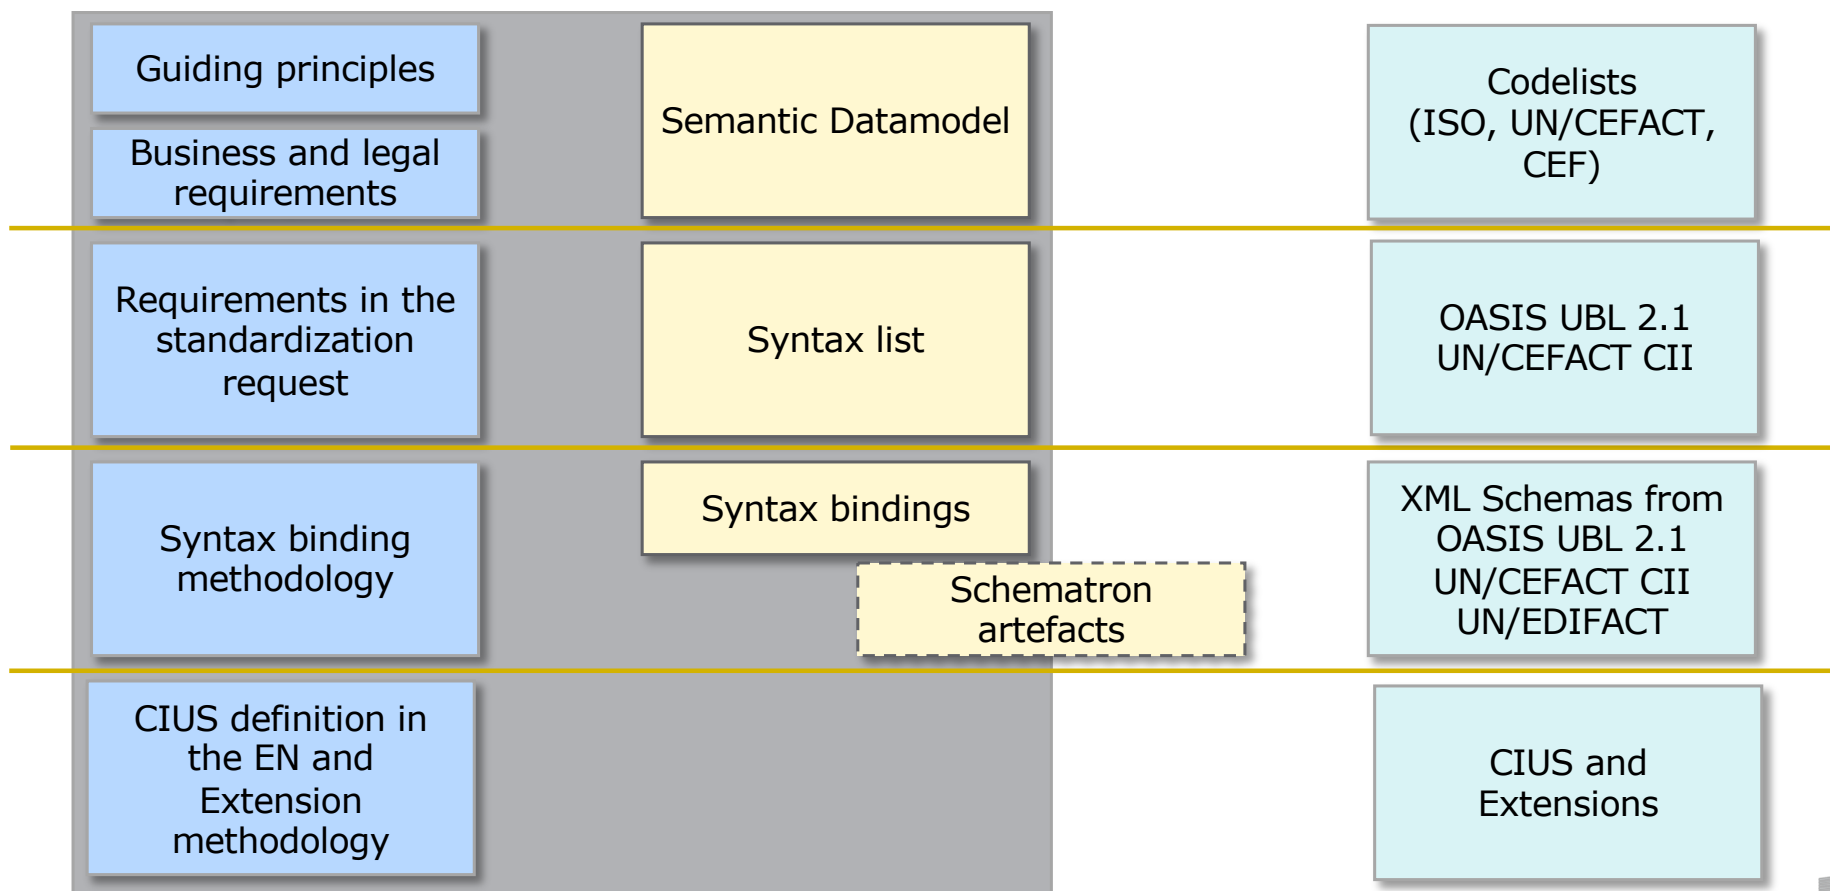

- Formats for VAT and organisation numbers
- Swedish VAT rates
- Tax registration F-Skatt
- Payment means Bankgiro and Plusgiro

<a href="#">SE-R-001</a>	Fatal
For Swedish suppliers, Swedish VAT-numbers must consist of 14 characters.	
<a href="#">SE-R-002</a>	Fatal
For Swedish suppliers, the Swedish VAT-numbers must have the trailing 12 characters in numeric form	
<a href="#">SE-R-003</a>	Fatal
Swedish organisation numbers should be numeric.	
<a href="#">SE-R-004</a>	Fatal
Swedish organisation numbers consist of 10 characters.	
<a href="#">SE-R-005</a>	Fatal
For Swedish suppliers, when using Seller tax registration identifier, 'Godkänd för F-skatt' must be stated	
<a href="#">SE-R-006</a>	Fatal
For Swedish suppliers, only standard VAT rate of 6, 12 or 25 are used	
<a href="#">SE-R-007</a>	Warning
For Swedish suppliers using Plusgiro, the Account ID must be numeric	
<a href="#">SE-R-008</a>	Warning
For Swedish suppliers using Bankgiro, the Account ID must be numeric	
<a href="#">SE-R-009</a>	Warning
For Swedish suppliers using Bankgiro, the Account ID must have 7-8 characters	
<a href="#">SE-R-010</a>	Warning
For Swedish suppliers using Plusgiro, the Account ID must have 2-8 characteres	
<a href="#">SE-R-011</a>	Warning
For Swedish suppliers using Swedish Bankgiro or Plusgiro, the proper way to indicate this is to use Code 30 for PaymentMeans and FinancialInstitutionBranch ID with code SE:BANKGIRO or SE:PLUSGIRO

---

A short introduction

---

## What is PEPPOL

Infrastructure where  
Buyers and Sellers can  
exchange  
e-documents

Specifications for  
electronic invoice,  
order, catalogue...

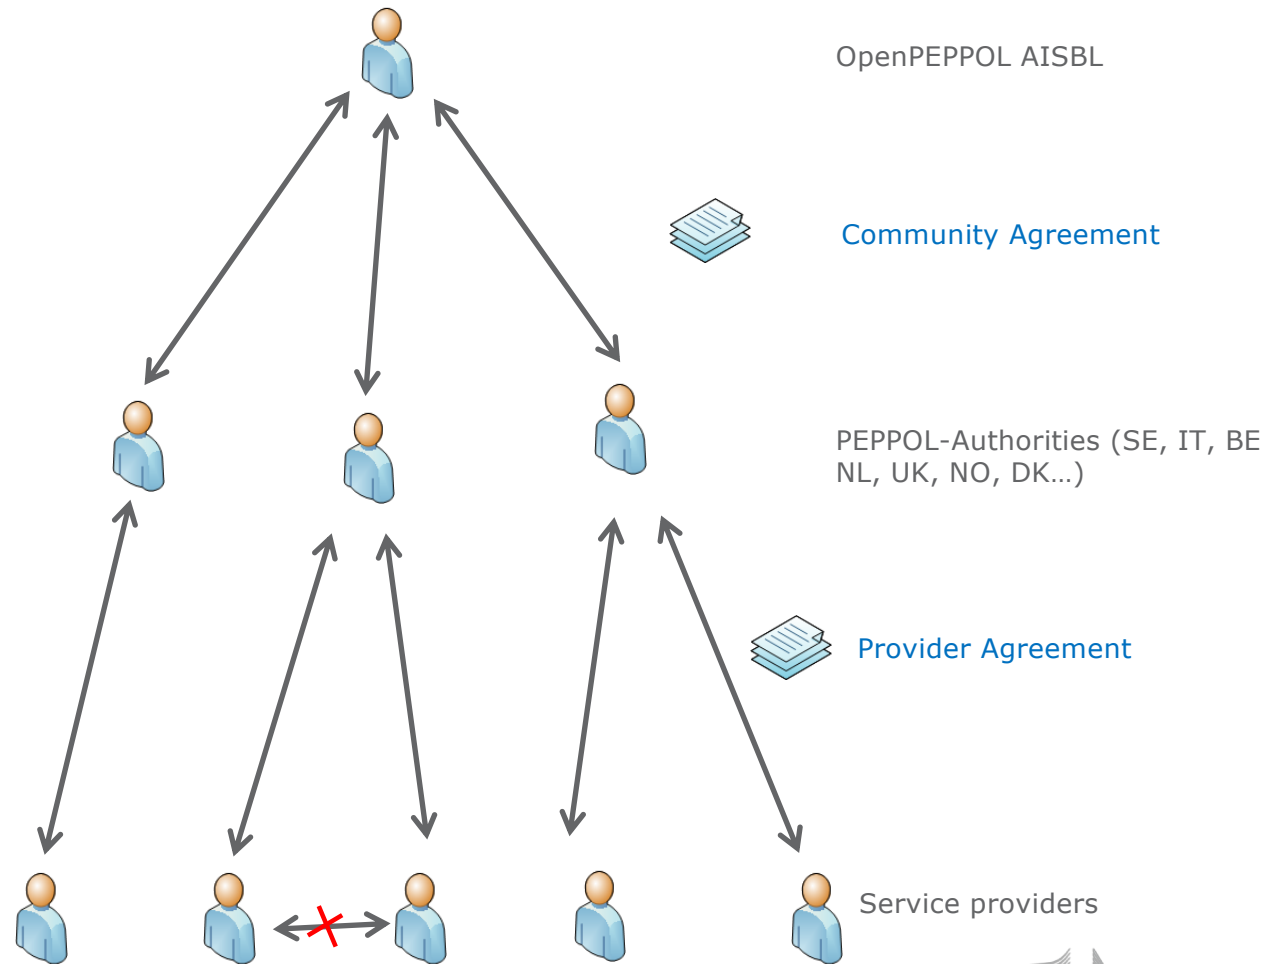

Non-for-profit  
organisation which  
maintains and  
governs

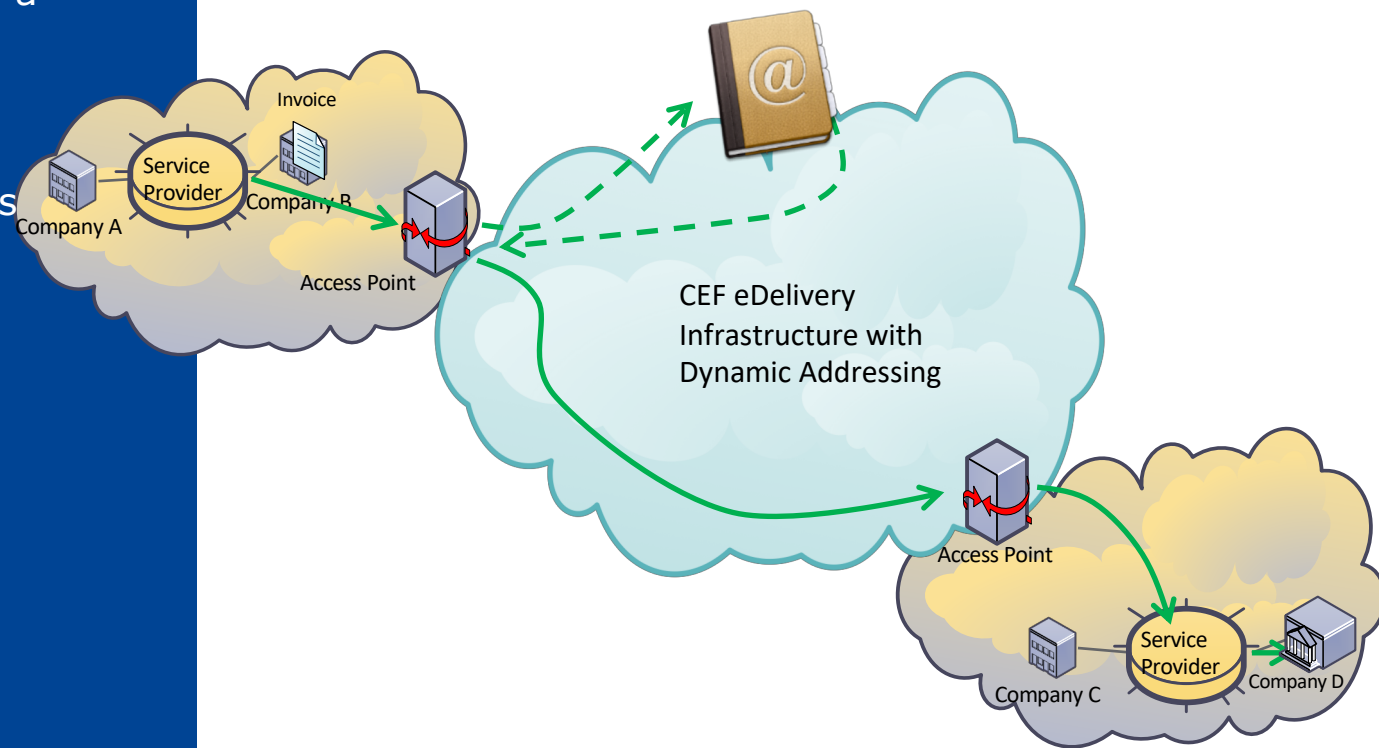

## Transport Infrastructure Agreements (TIA)

- The Access Point Provider and the Service Metadata Publisher Provider must sign a contract with OpenPEPPOL AISBL (or any of the PEPPOL Authorities)
- Agreements defines responsibilities, expectations, service levels and more
- Only providers who have signed the agreements can participate in the network (controlled by digital certificates on a communication level)

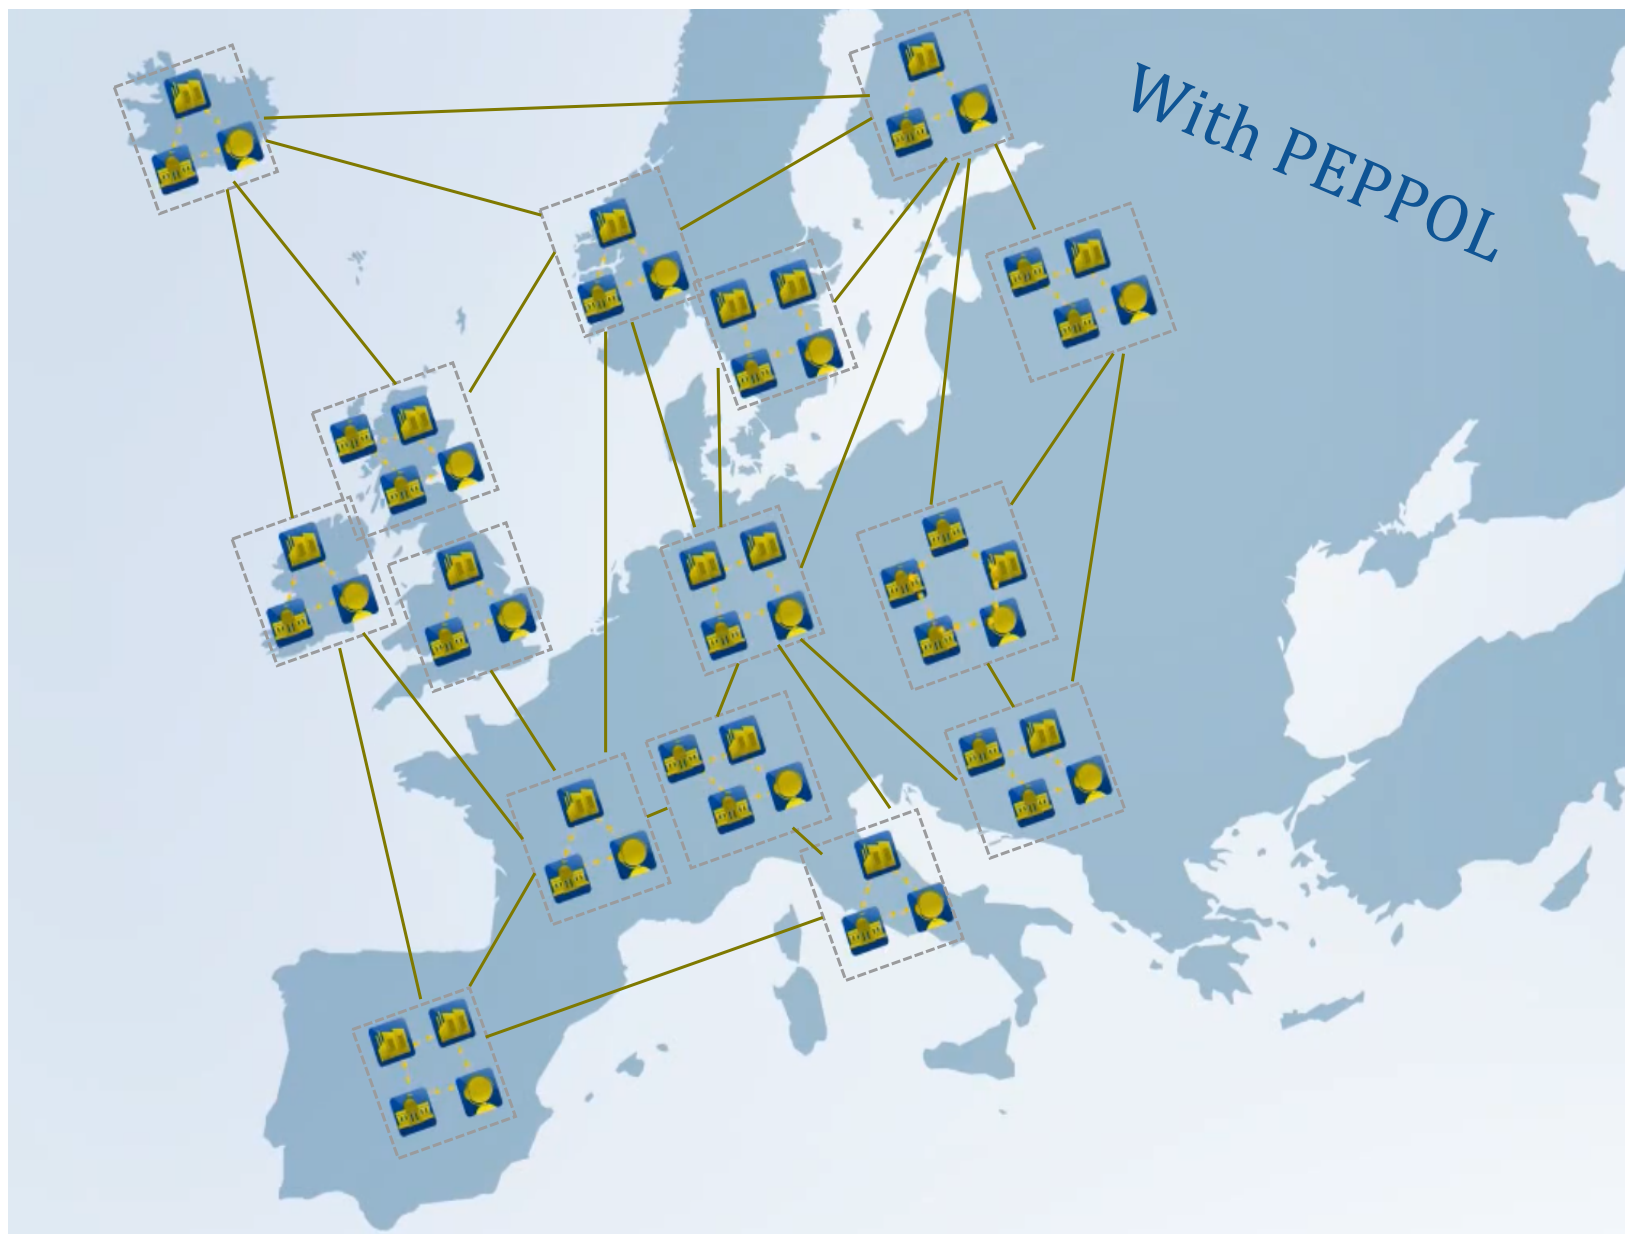

## CEF eDelivery (PEPPOL) offers dynamic addressing

- The receiving address is stored in a registry in the network
- No need for pre-configuration of each trading partner
- Dynamic addressing enables mass adoption
- Makes migration between service providers easier

# PEPPOL today

**176** Certified Access Points in **19** European countries, plus Canada and USA. More than **150.000** e-Invoice receiving organizations connected

## 12 PEPPOL Authorities

- Agency for Digital Italy (AgID) (Italy)
- Agency for Public Management and eGovernment (Difi) (Norway)
- Danish Business Authority (Denmark)
- Department of Health (UK)
- Department of Public Expenditure and Reform (Ireland)
- Federal Public Service Policy and Support (BOSA) (Belgium)
- Agency for Digital Government (DIGG) (Sweden)
- **Free Hanseatic City of Bremen – KoSIT (Germany)**
- Ministry of Economic Development (Poland)
- SimplerInvoicing (Netherlands)
- **Info-communications Media Development Authority (IMDA) (Singapore)**
- OpenPEPPOL AISBL

# Member state plans for the future

---

## Denmark

### TODAY

#### **eInvoice usage in public sector**

98 %

#### **Main syntax standard**

ISO/IEC 19845:2015 UBL

#### **Infrastructure**

NemHandel

### TOMORROW

#### **Implementaion of the EN/CIUS**

PEPPOL CIUS  
(+Rules for domestic suppliers)

#### **Plans for infrastructure**

PEPPOL and NemHandel in parallel.  
PEPPOL only long term.

#### **Legislation (transposition of the directive)**

eInvoicing already mandated for  
suppliers by law. Additional types  
fo public entities will be affected.

## Sweden

### TODAY

#### **eInvoice usage in public sector**

50% local/regional authorities  
60% governmental authorities

#### **Main syntax standard**

ISO/IEC 19845:2015 UBL

#### **Infrastructure**

Various

### TOMORROW

#### **Implementaion of the EN/CIUS**

PEPPOL CIUS  
(+Rules for domestic suppliers)

#### **Plans for infrastructure**

PEPPOL

#### **Legislation (transposition of the directive)**

Law mandating suppliers to invoice electronically both above and below threshold.

## Norway

### TODAY

#### **eInvoice usage in public sector**

70-80%

#### **Main syntax standard**

ISO/IEC 19845:2015 UBL

#### **Infrastructure**

PEPPOL

### TOMORROW

#### **Implementaion of the EN/CIUS**

PEPPOL CIUS  
(+Rules for domestic suppliers)

#### **Plans for infrastructure**

PEPPOL

#### **Legislation (transposition of the directive)**

Still under discussion. Potentially  
partial mandating.

## Netherlands

### TODAY

#### **eInvoice usage in public sector**

Central government 50%  
Regional/local 5%

#### **Main syntax standard**

ISO/IEC 19845:2015 UBL

#### **Infrastructure**

Central government - hub  
The rest - PEPPOL

### TOMORROW

#### **Implementaion of the EN/CIUS**

Country CIUS but will also accept  
PEPPOL CIUS

#### **Plans for infrastructure**

PEPPOL

#### **Legislation (transposition of the directive)**

As is from the directive. Mandate  
on the central government to  
require eInvoicing in new contracts.

## Austria

### TODAY

#### **eInvoice usage in public sector**

Federal government 50%  
The rest - ?%

#### **Main syntax standard**

Domestic XML format  
ISO/IEC 19845:2015 UBL

#### **Infrastructure**

Central service (webform+upload)  
PEPPOL

### TOMORROW

#### **Implementaion of the EN/CIUS**

Austrian CIUS on 2 levels. Country  
specific rules and government  
specific rules)  
PEPPOL for cross boarder

#### **Plans for infrastructure**

Central service (webform+upload)  
PEPPOL

#### **Legislation (transposition of the directive)**

As is from the directive

Tentative information – no formal decisions made

## Cyprus

### TODAY

#### **eInvoice usage in public sector**

0%

#### **Main syntax standard**

-

#### **Infrastructure**

-

### TOMORROW

#### **Implementaion of the EN/CIUS**

PEPPOL CIUS  
(+Rules for domestic suppliers)

#### **Plans for infrastructure**

PEPPOL

#### **Legislation (transposition of the directive)**

As is from the directive

Tentative information – no formal decisions made

## Poland

### TODAY

#### **eInvoice usage in public sector**

0%

#### **Main syntax standard**

-

#### **Infrastructure**

-

### TOMORROW

#### **Implementaion of the EN/CIUS**

PEPPOL CIUS  
(+Rules for domestic suppliers)

#### **Plans for infrastructure**

PEPPOL

#### **Legislation (transposition of the directive)**

As is from the directive

## Croatia

### TODAY

#### **eInvoice usage in public sector**

Small number

#### **Main syntax standard**

ISO/IEC 19845:2015 UBL

#### **Infrastructure**

Centralized solution

### TOMORROW

#### **Implementaion of the EN/CIUS**

PEPPOL CIUS  
Domestic CIUS

#### **Plans for infrastructure**

PEPPOL + Connection to central  
solution directly or through service  
provider

#### **Legislation (transposition of the directive)**

Under discussion but likely also  
below threshold, potentially  
mandating suppliers

## Main take aways so far...

- **Implementation of the EN is progressing** slowly, but still progressing over the next 12 (-18) months
- **CIUS is being developed** across different domains
  - **PEPPOL CIUS** is currently expected to be the most used
- Some **Member States** (MS) have moved from little or some knowledge, to now **good insight to the EN** and have actual roadmap for implementations
- Some **Member States** are **lacking behind...**
  - **Political backing**
  - **Lack of clear responsibility of eInvoicing within the MS**
  - **Lack of national expertise in implementation or governance of eInvoicing**

---

## 2018-2 eInvoicing call (2018 Work Programme)

2018-2 eInvoicing call	
Launch date	2 May 2018
Deadline	September 2018
Who can apply?/Consortium composition	Minimum 2 private or public entities from one or several Member States
Budget	€5 million
Co-financing	75% of the eligible costs
Indicative duration	12 months

---

## Scope of the last call:

- **Proposals must meet objective 1 or 2:**

**1. Uptake of eInvoicing solutions compliant with the EN and its ancillary deliverables by public entities**

**2. Update of eInvoicing solutions compliant with the EN and its ancillary deliverables by solution providers and public authorities**

- **Promotion of eDelivery:**

Deployment of the eDelivery Building Block or use of eDelivery through a service provider

Must be carried out in conjunction with objective 1 or 2

---

## 2018-2 eInvoicing call: **expected outcomes**

Increased uptake and use of eInvoicing by public authorities (especially regional/local) in meeting the requirements of the eInvoicing Directive

Support for service providers in making their existing solutions compliant with the requirements of the eInvoicing Directive

---

<b><u>CEF Telecom 2018-2</u></b>	<b><u>Proposals received</u></b>	<b><u>Requested budget</u></b>	<b><u>Available budget</u></b>	<b><u>Oversubscription rate</u></b>
Automated Translation	11	€8,964,037	€5,000,000	1.79
eDelivery	5	€829,330	€500,000	1.66
eInvoicing	19	€8,238,483	€5,000,000	1.65
<b>Total</b>	<b>35</b>	<b>€18,031,850</b>	<b>€10,500,000</b>	<b>1.72</b>

---

## CEF eInvoicing grants 2019

### **Generic Services**

**Budgetary brackets:** 6m-7m Euros

#### **Objectives:**

- Reinforced support to Member States lagging behind in terms of uptake of eInvoicing
- Finance innovative projects that allow achieving end-to-end eProcurement and integration with tax systems

#### **Core Service Platform:** 0.8-1.2m

- Training/Implementation workshops
- Country factsheets / eInvoicing Readiness Checker available since January 2017
- eInvoicing User Community

**Past eInvoicing calls**

---

## 2015-1 eInvoicing call

- Call opening: 15 September 2015 - Call closure: 11 February 2016
  - **Call objective:**
    - Increase uptake and the use of the eInvoicing DSI by supporting authorities – especially at the regional and local levels – in meeting the requirements of the eInvoicing Directive
  - **Overall indicative budget: €7 million**
  - **Co-funding rate:** 75% of eligible costs
  - **Proposals received: 10**
  - **Eligible proposals received: 8**
  - **Grant agreements: 8**
  - **Maximum EU contribution: €4,426,111**
- **1 action** already completed
  - **7 actions** on-going (all aiming to implement European eInvoicing standard), supporting:
    - Solution providers (AT - ecasio, ES - EDICOM, UK - ELCOM) in upgrading their solution to the eInvoicing standard + supporting users of the solutions
    - Uptake and upgrade of national eInvoicing platforms (CY, HR, ES, IT)
    - Tool for eInvoicing format mapping (NL, DE)

## 2015-1 eInvoicing call: Member States involved (13)

- 5 members  
(1 consortium)
- 6 members  
(4 consortia)
- 7 members  
(2 consortia)
- 8 or more  
members  
(1 consortium)

---

## 2016-3 eInvoicing call

- Call opening: 13 September 2016 - Call closure: 15 December 2016
- **Call objective:**
- Increase uptake and the use of the eInvoicing DSI by supporting authorities – especially at the regional and local levels – in meeting the requirements of the eInvoicing Directive
- **Overall indicative budget: €7 million**
- **Co-funding rate:** 75% of eligible costs
- **Proposals received: 21**
- **Eligible proposals received: 20**
- **Recommended proposals: 15**
- **Recommended funding: €10,401,818**
- Info below still indicative: grant agreement preparation now on-going (to be finalised by mid-September)
- Most of the actions to start between May and September 2017 and run until end of 2018
  - All will ensure the compliance with the European eInvoicing standard
  - Most will also deploy eDelivery
- Actions will support:
  - Solution providers and national eInvoicing solutions, including at the local level, to make them compliant with eInvoicing standard
  - Strong focus of some of the actions on onboarding suppliers and engaging with SMEs

## 2016-3 eInvoicing call

### Member States involved (22)

---

## 2017-3 eInvoicing call

- Call opening: 28 June 2017 - Call closure: 28 November 2017
- **Call objective:**
- Increase uptake and the use of the eInvoicing DSI by supporting authorities – especially at the regional and local levels – in meeting the requirements of the eInvoicing Directive
- **Overall indicative budget: €10 million**
- **Co-funding rate:** 75% of eligible costs
- **Proposals received: 23**
- **Eligible proposals received: 21**
- **Recommended proposals: 10**
- **Recommended funding: €8,800,000**
- Info below still indicative: grant agreement preparation will start in May 2018
- Most of the actions to start between May and September 2018 and run until end of 2019
  - All will ensure the compliance with the European eInvoicing standard
  - Most will also deploy eDelivery
- Actions will support:
  - Solution providers and national eInvoicing solutions, including at the local level, to make them compliant with eInvoicing standard
  - Strong focus of some of the actions on onboarding suppliers and engaging with SMEs

## 2017-3 eInvoicing call

### Member States involved (16)

## Member States Number of projects and CEF funding (€ thousand)

## EEA and Third Countries Number of projects and CEF funding (€ thousand)

## CEF Telecom 2014-2016
